

National Healthcare Agreement: PI 23-Selected potentially avoidable GP-type presentations to emergency departments, 2012

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Progress measure
Short name:	PI 23-Selected potentially avoidable GP-type presentations to emergency departments, 2012
METEOR identifier:	443689
Registration status:	<ul style="list-style-type: none">Health, Superseded 25/06/2013
Description:	Attendances at public hospital emergency departments that could have potentially been avoided through the provision of appropriate non-hospital services in the community.
Indicator set:	National Healthcare Agreement (2012) Health , Superseded 25/06/2013
Outcome area:	Primary and Community Health Health , Standard 07/07/2010
Quality statement:	National Healthcare Agreement: PI 23-Selected potentially avoidable GP-type presentations to emergency departments, 2012 QS Health, Superseded 14/01/2015

Collection and usage attributes

Computation description:	<p>Potentially avoidable GP-type presentations are defined as presentations to public hospital emergency departments with a Type of visit of <i>Emergency presentation</i> (or for South Australia only, Type of visit can be <i>Emergency presentation or Not reported</i>) where the patient:</p> <ul style="list-style-type: none">was allocated a Triage category of 4 or 5 anddid not arrive by ambulance or police or correctional vehicle andwas not admitted to the hospital, not referred to another hospital, or did not die. <p>Limited to public hospitals in Peer Groups A and B.</p> <p>Analysis by state and territory, remoteness and SEIFA Index of Relative Socioeconomic Disadvantage (IRSD) is based on usual residence of person.</p> <p>Presented as a number.</p>							
Computation:	Numerator only.							
Numerator:	Number of potentially avoidable GP-type presentations to emergency departments.							
Numerator data elements:	<table border="1"><thead><tr><th>Data Element / Data Set</th></tr></thead><tbody><tr><td>Data Element</td></tr><tr><td>Hospital peer group</td></tr><tr><td>Data Source</td></tr><tr><td>National Non-admitted Patient Emergency Department Care Database</td></tr><tr><td>NMDS / DSS</td></tr><tr><td>Non-admitted patient emergency department care NMDS 2008-10</td></tr></tbody></table>	Data Element / Data Set	Data Element	Hospital peer group	Data Source	National Non-admitted Patient Emergency Department Care Database	NMDS / DSS	Non-admitted patient emergency department care NMDS 2008-10

Guide for use

Data source type: Administrative by-product data

Disaggregation:

2009-10 (updated for peer group) and 2010–11—Nationally by SEIFA Index of Relative Socioeconomic Disadvantage (IRSD) deciles

2009-10 (updated for peer group) and 2010–11—State and territory, by:

- Indigenous status
- remoteness (Australian Standard Geographical Classification Remoteness Structure)
- SEIFA IRSD quintiles
- peer group and triage category

Some disaggregations may result in numbers too small for publication.

Disaggregation by peer group is limited to Peer Groups A and B, as this is the scope of the collection, and coverage varies for other hospitals by state and territory.

Guide for use

Data source type: Administrative by-product data

Comments: Most recent data available for 2012 CRC report: 2010–11.

This definition of 'potentially avoidable GP-type presentation' was used in the Booz Allen Hamilton study of emergency department care in NSW, and is considered to be a reasonable starting approximation of the population that should be receiving service in the primary care sector.

Representational attributes

Representation class: Count
Data type: Real
Unit of measure: Episode
Format: NN[NNNNN]

Accountability attributes

Reporting requirements: National Healthcare Agreement
Organisation responsible for providing data: Australian Institute of Health and Welfare
Benchmark: [National Healthcare Agreement performance benchmark and National Partnership on Taking Pressure Off Public Hospitals performance benchmark:](#)
By 2012–13, 80 percent of emergency department presentations are seen within clinically recommended triage times as recommended by the Australian College of Emergency Medicine.
[National Partnership on Taking Pressure Off Public Hospitals performance benchmark:](#)
By 2013–14, 95 per cent of hospitals with an ED report to the non-admitted emergency care national minimum data set collection.
[National Partnership Agreement on Taking Pressure Off Public Hospitals output measures:](#)
Output: A nationally accepted definition of what a non emergency GP type presentation is based on emergency department DRGs by June 2012.
Joint Roles: D10 Commonwealth and States to develop a nationally consistent DRG based definition of a non emergency primary care presentation.
Further data development / collection required: Specification: Interim
