National Disability Agreement: b(3)-Proportion of people with disability who participate in social and community activities, 2011

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Indicator
Short name:	Proportion of people with disability who participate in social and community activities, 2011
METEOR identifier:	445217
Registration status:	Community Services (retired) , Superseded 05/03/2012
Description:	Social and community participation of people with disability
Indicator set:	National Disability Agreement (2011) Community Services (retired) , Superseded 05/03/2012
Outcome area:	People with disability achieve economic participation and social inclusion Community Services (retired) , Standard 23/07/2010 Disability , Standard 13/08/2015

Collection and usage attributes

Population group age from:	5 years
Population group age to:	64 years
Computation description:	This indicator will be calculated using the definitions for social participation given in the glossary.
Computation:	$R/N \times 100$ Where R = numerator N = denominator $R/N \times 100$ where R = number of persons aged 5–64 with disability who report the main reason for not leaving home as often as they would like is their disability and N = total number of persons with disability aged 5–64 years.
Numerator:	Measure (b.3) Number of persons aged 5–64 years with disability who report the main reason for not leaving home as often as they would like is their disability or condition.

Numerator data elements:

Comments:

Representational attributes

Representation class: Percentage

Data type: Real

Unit of measure: Person

Data source attributes

Data sources:**Data Source**

[ABS Survey of Disability, Ageing and Carers \(SDAC\), 2009](#)

Data custodian

Australian Bureau of Statistics

Accountability attributes

- Reporting requirements:** (b.3) SDAC for all data.
- Organisation responsible for providing data:** Australian Bureau of Statistics with input from AIHW on social and community activities in scope.
- Further data development / collection required:** Frequency of data source is listed on the NDIMG workplan for discussion/consideration.
- Other issues caveats:** Available disaggregation depends on sampling errors and other caveats.
- Reporting issues are the same as listed in performance indicator a.
- SDAC data are collected every six years.
- 2003 SDAC does not provide this data for the Indigenous population, therefore Indigenous data is needs to be taken from a different source (e.g. NATSISS 2008).
- The NATSISS uses an abbreviated form of the Disability Module, which is less detailed than the SDAC.
- Social and community activities as defined in the NATSISS are more culturally appropriate for Indigenous Australians than those in the SDAC.
- Comparison data for the non-disabled population is only available for the first of these performance indicators, from the General Social Survey 2006.
