Health of the Nation Outcome Scale 65+ score code N

Identifying and definitional attributes

Metadata item type:	Value Domain
METEOR identifier:	449356
Registration status:	Health , Superseded 28/02/2017 Independent Hospital Pricing Authority , Standard 15/10/2014 Tasmanian Health , Superseded 19/01/2018
Definition:	A code set representing the severity of psychiatric symptoms of an individual aged 65 years and over.

Representational attributes

Representation class:	Code	
Data type:	Number	
Format:	N	
Maximum character length:	1	
	Value	Meaning
Permissible values:	0	No problems within the period stated
	1	Minor problem requiring no action
	2	Mild problem but definitely present
	3	Moderately severe problem
	4	Severe to very severe problem

Collection and usage attributes

Guide for use:	The Health of the Nation Outcome Scale for elderly people (HoNOS65+) is used to rate adult mental health service users. Together, the scales rate various aspects of mental and social health.
-----------------------	--

HoNOS65+ is answered on an item-specific anchored 4-point scale with higher scores indicating more problems. Each scale is assigned a value of between 0 and 4. The twelve scales are as follows:

- Behavioural disturbance
- Non-accidental self injury
- Problem drinking or drug use
- Cognitive problems
- Problems related to physical illness or disability
- Problems associated with hallucinations and delusions
- Problems associated with depressive symptoms
- Other mental and behavioural problems
- Problems with social or supportive relationships
- Problems with activities of daily living
- Overall problems with living conditions
- Problems with work and leisure activities and the quality of the daytime environment

The sum of the individual scores of each of the scales represents the total HoNOS65+ score. The total HoNOS65+ score ranges from 0 to 48, and represents the overall severity of an individual's psychiatric symptoms.
