Address—statistical area

Identifying and definitional attributes

Metadata item type:	Data Element Concept
METEOR identifier:	457285
Registration status:	Children and Families , Standard 22/11/2016 Community Services (retired) , Standard 06/12/2011 Disability , Standard 13/08/2015 Early Childhood , Superseded 24/07/2018 Health , Superseded 06/12/2016 National Health Performance Authority (retired) , Retired 01/07/2016
Definition:	A designated region with a pre-determined population used for describing location and contact details. Based on the Australian Statistical Geography Standard (ASGS) structure of six hierarchical statistical area levels comprised in ascending order.

Object Class attributes

Identifying and definitional attributes

Object class:	Address
Definition:	A collection of information used for describing the location of an entity and/or details describing how the entity can be contacted.
Specialisation of:	Location

Source and reference attributes

Submitting organisation:	Australian Institute of Health and Welfare
---------------------------------	--

Property attributes

Identifying and definitional attributes

Property:	Statistical area
Definition:	A designated region with a pre-determined population range primarily for statistical usage. Based on the Australian Statistical Geography Standard (ASGS) structure of six hierarchical statistical area levels comprised in ascending order. Each level directly aggregates to the level above. This principle continues up through the remaining levels of the hierarchy.
Property group:	Location characteristics

Source and reference attributes

Submitting organisation:	Australian Institute of Health and Welfare
