Person—first language spoken, code (ASCL 2011)

NN{NN}

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	First language spoken
METEOR identifier:	460120
Registration status:	Community Services (retired) , Standard 13/10/2011 Disability , Standard 13/08/2015 Health , Standard 13/10/2011 Homelessness , Superseded 10/08/2018 [Non Dictionary] Housing assistance , Standard 13/10/2011 [Non Dictionary]
Definition:	The language the person identifies as being the first language that they could understand to the extent of being able to conduct a conversation, as represented by a code.

Data element concept attributes

Identifying and definitional attributes

Data element concept:	Person—first language spoken
METEOR identifier:	269743
Registration status:	Community Services (retired) , Standard 01/03/2005 Disability , Standard 13/08/2015 Health , Standard 13/10/2011 Homelessness , Superseded 10/08/2018 Housing assistance , Standard 01/08/2005
Definition:	The language the person identifies, or remembers, as being the first language that they could understand to the extent of being able to conduct a conversation.
Object class:	Person
Property:	First language spoken

Value domain attributes

Identifying and definitional attributes

Value domain:	Language code (ASCL 2011) NN{NN}
METEOR identifier:	460118
Registration status:	Children and Families , Superseded 20/01/2021 Community Services (retired) , Standard 13/10/2011 Disability , Standard 13/08/2015 Health , Superseded 25/01/2018 Homelessness , Superseded 10/08/2018 Housing assistance , Standard 13/10/2011 Tasmanian Health , Superseded 27/06/2017
Definition:	The Australian Standard Classification of Languages (ASCL 2011) code set representing languages.

Representational attributes

Classification scheme:	Australian Standard Classification of Languages 2011
Representation class:	Code

Data type: Number
Format: NN{NN}
Maximum character length: 4

Collection and usage attributes

Guide for use:

The Australian Standard Classification of Languages (ASCL) has a three-level hierarchical structure. The most detailed level of the classification consists of base units (languages) which are represented by four-digit codes. The second level of the classification comprises narrow groups of languages (the Narrow group level), identified by the first two digits. The most general level of the classification consists of broad groups of languages (the Broad group level) and is identified by the first digit. The classification includes Australian Indigenous languages and sign languages.

For example, the Lithuanian language has a code of 3102. In this case 3 denotes that it is an Eastern European language, while 31 denotes that it is a Baltic language. The Pintupi Aboriginal language is coded as 8713. In this case 8 denotes that it is an Australian Indigenous language and 87 denotes that the language is a Western Desert language.

Language data may be output at the Broad group level, Narrow group level or base level of the classification. If necessary, significant languages within a Narrow group can be presented separately while the remaining languages in the Narrow group are aggregated. The same principle can be adopted to highlight significant Narrow groups within a Broad group.

Data element attributes

Collection and usage attributes

Collection methods:

Data should be captured, classified and stored at the base level of the classification wherever possible as this allows the greatest flexibility for output.

Recommended question:

Which language did you/did the person/did (name)/will (name of child under two years) first speak as a child?

While agencies are encouraged to use the recommended question described above, it is acknowledged that this is not always possible in practice. For example, where the data collection is a by-product of the provision of a health or community service, the information may be ascertained using different means. However, this standard should be used wherever practically possible.

Response options for detailed data:

Alternative 1

English ☐
Mandarin ☐
Italian ☐
Arabic ☐
Cantonese ☐
Greek ☐
Vietnamese ☐
Spanish ☐
Hindi ☐
Tagalog ☐
Other - please specify

The above list includes languages based on their statistical significance in the Australian context. The list is reviewed when data indicate that different languages have been more or less frequently reported in the Census of Population and Housing.

Alternative 2

English ☐
Other - please specify

Response option for minimum data:

English ☐
Other ☐

Comments:

Persons whose first language is not English have been identified by service providers as a population group that may experience disadvantage when seeking to obtain equal access to government and community programs and services in Australia. Data relating to 'First language spoken' may thus provide a surrogate indicator of disadvantage potentially associated with a lack of English competence or with other factors associated with cultural background.

The ABS Language Standards, 2012, Version 1.1 (cat. no. 1200.0.55.005) was released in September 2012. The recommended question recognises children under two years of age.
