Identifying and definitional attributes

Value domain:	Yes/no/unknown code N
METEOR identifier:	428208

- Registration status:**
- [ACT Health \(retired\)](#), Candidate 09/08/2018
 - [Health](#), Standard 08/05/2014

Definition: A code set representing 'yes', 'no' and 'unknown' responses.

Representational attributes

Representation class: Code

Data type: Number

Format: N

Maximum character length: 1

Permissible values:

Value	Meaning
-------	---------

1	Yes
---	-----

2	No
---	----

Supplementary values:

Value	Meaning
-------	---------

8	Unknown
---	---------

Data element attributes

Collection and usage attributes

Guide for use: Record whether the patient used specialist support services as part of their care during a round of treatment for cancer.

Specialist support services include community services, allied health services and other hospital support service, such as the use of psychiatrists, psychologists, physiotherapists, social workers, specialist nurses/nurse counsellors, cancer support or volunteer support groups, individual peer support services, counsellor/bereavement counsellor and pastoral care workers.

Collection methods: This information should be sought from the patient's medical record or collected in multi-disciplinary team meetings.

Comments: This information is used to evaluate the quality of care for patients with cancer, and may have implications for access to, and the provision of, cancer services.
