Person with cancer—fertility counselling offered indicator, yes/no/unknown code N

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Fertility counselling offered indicator
METEOR identifier:	462742
Registration status:	Health , Standard 04/02/2015
Definition:	An indicator of whether fertility counselling related to cancer or cancer treatment has been offered to a person with cancer, as represented by a code.
Data Element Concept:	Person with cancer—fertility counselling offered indicator
Value Domain:	Yes/no/unknown code N

Value domain attributes

Representational attributes

Representation class:	Code	
Data type:	Number	
Format:	N	
Maximum character length:	1	
	Value	Meaning
Permissible values:	1	Yes
	2	No
Supplementary values:	8	Unknown

Data element attributes

Collection and usage attributes

Guide for use:	Record whether fertility counselling related to cancer or cancer treatment has been offered to a person with cancer. This includes counselling about the potential outcomes that the cancer and cancer treatment can have on their long term fertility and the options that they have in relation to fertility preservation or treatment options that will likely have a reduced impact on their fertility.
Collection methods:	Obtain from patient medical records or multidisciplinary team meetings.

Source and reference attributes

Submitting organisation:	Cancer Australia
