Data type:	Number
Format:	N
Maximum character length:	1

	Value	Meaning
Permissible values:	1	Yes
	2	No
Supplementary values:	8	Unknown

Data element attributes

Collection and usage attributes

Guide for use:	Record whether fertility counselling related to cancer or cancer treatment was provided to a person with cancer. This includes counselling about the potential outcomes that the cancer and cancer treatment can have on their long term fertility and the options that they have in relation to fertility preservation or treatment options that will likely have a reduced impact on their fertility.
Collection methods:	Obtain from patient medical records or multidisciplinary team meetings.

Source and reference attributes

Submitting organisation:	Cancer Australia
