

Cancer treatment—treatment complication outcome, code N

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Treatment complication outcome
METEOR identifier:	467416
Registration status:	<ul style="list-style-type: none">• Health, Standard 04/02/2015
Definition:	The outcome of a treatment complication (adverse event) during a person's treatment for cancer, as represented by a code.
Data Element Concept:	Cancer treatment—treatment complication outcome

Value domain attributes

Representational attributes

Representation class:	Code								
Data type:	Number								
Format:	N								
Maximum character length:	1								
Permissible values:	<table><thead><tr><th>Value</th><th>Meaning</th></tr></thead><tbody><tr><td>1</td><td>Adverse events/toxicities that limited the treatment dose</td></tr><tr><td>2</td><td>Adverse events/toxicities that delayed treatment</td></tr><tr><td>3</td><td>Adverse events/toxicities that adversely affected performance status post treatment</td></tr></tbody></table>	Value	Meaning	1	Adverse events/toxicities that limited the treatment dose	2	Adverse events/toxicities that delayed treatment	3	Adverse events/toxicities that adversely affected performance status post treatment
Value	Meaning								
1	Adverse events/toxicities that limited the treatment dose								
2	Adverse events/toxicities that delayed treatment								
3	Adverse events/toxicities that adversely affected performance status post treatment								
Supplementary values:	<table><thead><tr><th>Value</th><th>Meaning</th></tr></thead><tbody><tr><td>8</td><td>Unknown</td></tr><tr><td>9</td><td>Adverse events/toxicities but they are inadequately described</td></tr></tbody></table>	Value	Meaning	8	Unknown	9	Adverse events/toxicities but they are inadequately described		
Value	Meaning								
8	Unknown								
9	Adverse events/toxicities but they are inadequately described								

Source and reference attributes

Submitting organisation: Cancer Australia

Data element attributes

Collection and usage attributes

Guide for use:	Record the outcome of a treatment complication (adverse event) during a person's treatment for cancer. This item can be recorded multiple times if an adverse event has multiple effects on treatment, or for multiple adverse events.
Collection methods:	Collect from patient medical records.
