

Episode of treatment for alcohol and other drugs—drug of concern (other), (ASCDC 2011 extended) code NNNN

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Other drug of concern
METEOR identifier:	467579
Registration status:	<ul style="list-style-type: none">• Health, Standard 07/12/2011
Definition:	A drug apart from the principal drug of concern which the client states as being a concern, as represented by a code.
Data Element Concept:	Episode of treatment for alcohol and other drugs—drug of concern

Value domain attributes

Representational attributes

Classification scheme:	Australian Standard Classification of Drugs of Concern 2011						
Representation class:	Code						
Data type:	String						
Format:	NNNN						
Maximum character length:	4						
Supplementary values:	<table><thead><tr><th>Value</th><th>Meaning</th></tr></thead><tbody><tr><td>0005</td><td>Opioid analgesics not further defined</td></tr><tr><td>0006</td><td>Psychostimulants not further defined</td></tr></tbody></table>	Value	Meaning	0005	Opioid analgesics not further defined	0006	Psychostimulants not further defined
Value	Meaning						
0005	Opioid analgesics not further defined						
0006	Psychostimulants not further defined						

Collection and usage attributes

Guide for use: The Australian Standard Classification of Drugs of Concern (ASCDC) provides a number of supplementary codes that have specific uses and these are detailed within the ASCDC, e.g. 0000 = inadequately described.

Other supplementary codes that are not already specified in the ASCDC may be used in National Minimum Data Sets (NMDS) when required. In the Alcohol and other drug treatment service NMDS, two additional supplementary codes have been created which enable a finer level of detail to be captured:

CODE 0005 Opioid analgesics not further defined

This code is to be used when it is known that the client's principal drug of concern is an opioid but the specific opioid used is not known. The existing code 1000 combines opioid analgesics and non-opioid analgesics together into Analgesics nfd and the finer level of detail, although known, is lost.

CODE 0006 Psychostimulants not further defined

This code is to be used when it is known that the client's principal drug of concern is a psychostimulant but not which type. The existing code 3000 combines stimulants and hallucinogens together into Stimulants and hallucinogens nfd and the finer level of detail, although known, is lost.

Psychostimulants refer to the types of drugs that would normally be coded to 3100-3199, 3300-3399 and 3400-3499 categories plus 3903 and 3905.

Data element attributes

Collection and usage attributes

Guide for use: Record each additional drug of concern (according to the client) relevant to the treatment episode. The other drug of concern does not need to be linked to a specific treatment type.

More than one drug may be selected. There should be no duplication with the principal drug of concern.

Collection methods: Any other drug of concern for the client should be recorded upon commencement of a treatment episode.

For clients whose treatment episode is related to the alcohol and other drug use of another person, this metadata item should not be collected.

Comments: This item complements principal drug of concern. The existence of other drugs of concern may have a role in determining the types of treatment required and may also influence treatment outcomes.

Source and reference attributes
