Cancer treatment—treatment complication type, text X[X(149)]

Identifying and definitional attributes

Metadata item type: Data Element

Short name: Treatment complication description

METEOR identifier: 467640

Registration status: Health, Standard 08/05/2014

Definition: The type of <u>treatment complication</u> (or complications) experienced by a person

with cancer during their treatment for cancer and attributed to that treatment, as

represented by text.

Data element concept attributes

Identifying and definitional attributes

Data element concept: Cancer treatment—treatment complication type

METEOR identifier: 425587

Registration status: Health, Standard 08/05/2014

Definition: The type of <u>treatment complication</u> (or complications) experienced by a person

with cancer during their treatment for cancer and attributed to that treatment.

Object class: <u>Cancer treatment</u>

Property: <u>Treatment complication type</u>

Source and reference attributes

Submitting organisation: Cancer Australia

Value domain attributes

Identifying and definitional attributes

Value domain: $\underline{\text{Text X}[X(149)]}$

METEOR identifier: 393619

Registration status: Health, Standard 07/12/2011

Definition: A combination of alphanumeric characters.

Representational attributes

Representation class: Text

Data type: String

Format: X[X(149)]

Maximum character length: 150

Data element attributes

Collection and usage attributes

Guide for use: Record any immediate or short-term treatment complications (adverse events or

toxicities) that were experienced by a person with cancer during their treatment for

cancer.

This includes any adverse events or treatment complications taking place within 30

days of treatment.

Collection methods: Collect from patient medical records.

Source and reference attributes

Submitting organisation: Cancer Australia
