National Disability Agreement: a(2)-Labour force participation rate for people with disability aged 15-64 years, 2012

Exported from METEOR (AIHW's Metadata Online Registry)

National Disability Agreement: a(2)-Labour force participation rate for people with disability aged 15-64 years, 2012

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Indicator
Short name:	Labour force participation rate for people with disability aged 15-64 years, 2012
METEOR identifier:	467827
Registration status:	[Community Services (retired)](), Superseded 23/05/2013
Description:	The proportion of persons with disability aged 15-64 years who are employed.
Indicator set:	[National Disability Agreement (2012)]() [Community Services (retired)](), Superseded 23/05/2013
Outcome area:	[People with disability achieve economic participation and social inclusion]() [Community Services (retired)](), Standard 23/07/2010 [Disability](), Standard 13/08/2015

Collection and usage attributes

Population group age from:	15 years old.
Population group age to:	64 years old.
Computation description:	Number of persons with disability aged 15-64 years who employed divided by number of persons with disability aged 15-64 years.
Computation:	R/N x 100 where R = number of persons with disability aged 15-64 years who are employed and N = number of persons with disability aged 15-64 years.
Numerator:	Number of persons with disability aged 15-64 years who are employed.

Accountability attributes

Reporting requirements: **Data Source Numerator:**

                                   ABS Survey of Disability, Ageing and Carers (SDAC), 2009

                                   (Indigenous): NATSISS, 2008.

                                   Data Source Denominator:

                                   ABS Survey of Disability, Ageing and Carers (SDAC), 2009

                                   (Indigenous): NATSISS, 2008.

Organisation responsible   Australian Bureau of Statistics.
for providing data:

Benchmark: Related NDA benchmark - Performance benchmark (a) An increase in the
                                   proportion of people with disability in employment.

Other issues caveats: Available disaggregation depends on sampling errors and other caveats.

                                   SDAC does not collect labour force participation information for persons in cared
                                   accommodation. Data are available for private dwelling and non-cared
                                   accommodation special dwellings only.

                                   2012 report

                                   - 2009 SDAC is the latest available source for data about the labour force
                                   participation rate of people with disability.

                                   - 2009 SDAC does not provide this data for the Indigenous population, therefore
                                   Indigenous data needs to be taken from a different source (e.g. NATSISS 2008).

                                   - The NATSISS uses an abbreviated form of the Disability Module, which is less
                                   detailed that the SDAC.

                                   - 'Not disabled' is a category in the 'Disability status' variable, so data comparable
                                   the disabled and non-disabled populations are available in the disaggregation's
                                   listed above.
