Person with cancer—care coordinator assignment indicator, yes/no/pending code N

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Care coordinator assignment indicator
METEOR identifier:	467848
Registration status:	Health , Standard 04/03/2015
Definition:	An indicator of whether a care coordinator has been assigned to the person with cancer, as represented by a code.
Data Element Concept:	Person with cancer—care coordinator assignment indicator
Value Domain:	Yes/no/pending code N

Value domain attributes

Representational attributes

Representation class:	Code	
Data type:	Number	
Format:	N	
Maximum character length:	1	
Permissible values:	Value	Meaning
	1	Yes
	2	No
	3	Pending

Source and reference attributes

Submitting organisation: Cancer Australia

Data element attributes

Collection and usage attributes

Guide for use:	CODE 2 No
	This code should be recorded when a care coordinator will not be assigned for treatment of the current cancer.
	CODE 3 Pending
	This code should be recorded when a care coordinator is yet to be assigned but will be in the course of treatment for the current cancer
	Record the appropriate code indicating whether a care coordinator has been assigned to a person with cancer. A care coordinator may be assigned to a patient through treatment and/or follow-up care.
	The role of a care coordinator is to achieve continuity of care for patients and to ensure that care is delivered in a timely, logical and connected fashion so that the medical and personal needs of the patient are met.

Collection methods: Collect from patient medical records and multidisciplinary team meetings.
