Cancer treatment—external beam radiotherapy type

Identifying and definitional attributes

Metadata item type: Data Element Concept

METEOR identifier: 468069

Registration status: Health, Standard 04/02/2015

Definition: The type of external beam radiotherapy (XRT) used for cancer treatment.

Object Class attributes

Identifying and definitional attributes

Object class: <u>Cancer treatment</u>

Definition: The course of cancer-directed treatment or treatments, with defined dates of

commencement and cessation, given to the patient by a treatment provider or team

of providers.

This may include cancer-directed surgical treatment, radiation therapy and systemic agent therapy for cancer. It applies to the primary course of cancer treatment, treatment administered to the patient in response to disease progression or treatment administered to the patient in response to disease

recurrence.

Specialisation of: Service/care event
