Indigenous primary health care: Pl07b-Proportion of regular clients with a chronic disease who have received a GP Management Plan (MBS Item 721), 2013

Identifying and definitional attributes

Metadata item type: Indicator Indicator type: Indicator

Short name: Pl07b-Proportion of regular clients with a chronic disease who have received a GP

Management Plan (MBS Item 721), 2013

METEOR identifier: 468104

Registration status: Health, Superseded 21/11/2013

Indigenous, Superseded 21/11/2013

Description: Proportion of regular clients who are Indigenous, have a chronic disease and who

have received a GP Management Plan (MBS Item 721) within the previous 24

months.

Rationale: Effective management of chronic disease can delay the progression of disease,

decrease the need for high-cost interventions, improve quality of life, and increase life expectancy. The development of a GP Management Plan is one way in which the client and primary health care provider can ensure appropriate care is

coordinated.

Indigenous primary health care key performance indicators (2013)

Health, Superseded 21/11/2013 Indigenous, Superseded 21/11/2013

Collection and usage attributes

Computation description:

Proportion of regular clients who are Indigenous, have a chronic disease and who have received a GP Management Plan (MBS Item 721) within the previous 24 months.

'Regular client' refers to a client of an OATSIH-funded primary health care service (that is required to report against the Indigenous primary health care key performance indicators) who has an active medical record; that is, a client who has attended the OATSIH-funded primary health care service at least 3 times in 2 years.

GP Management Plan (MBS Item 721): The Chronic Disease Management (CDM) Medicare items on the Medicare Benefits Schedule (MBS) enable GPs to plan and coordinate the health care of patients with chronic or terminal medical conditions (Department of Health and Ageing 2011). GP Management Plans, for the purpose of this indicator, are defined in the MBS (Item 721).

Presented as a percentage.

Calculated separately for each chronic disease type:

A) Type II diabetes

Exclude Type I diabetes, secondary diabetes, gestational diabetes mellitus (GDM), previous GDM, impaired fasting glucose, impaired glucose tolerance.

- B) Cardiovascular disease
- C) Chronic obstructive pulmonary disease
- D) Chronic kidney disease

At this stage, this indicator is only calculated for **Type II diabetes** as currently this is the only relevant chronic disease type with an agreed national definition.

Computation:

(Numerator ÷ Denominator) x 100

Numerator:

Calculation A: Number of regular clients who are Indigenous, have Type II diabetes and who have received a GP Management Plan (MBS Item 721) within the previous 24 months.

Numerator data elements:

Data Element / Data Set-

Person—diabetes mellitus status, code NN
