Adoptive family—sibling composition, type code N[N]

Identifying and definitional attributes

Metadata item type: Data Element

Short name: Adoptive family sibling composition

METEOR identifier: 468209

Registration status: Community Services (retired), Standard 20/05/2013

Definition: The sibling composition of the <u>family</u> into which a child is adopted, as represented

by a code.

Data Element Concept: Adoptive family—sibling composition

Value Domain: Adoptive family composition type code N[N]

Value domain attributes

Representational attributes

Representation class: Code

Data type: Number

Format: N[N]

Maximum character length: 2

	Value	Meaning
Permissible values:	1	No other children in family
	2	Biological children only
	3	Adopted children only
	4	Both biological and adopted children
	8	Other
	9	Unknown
Supplementary values:	99	Not stated/inadequately described

Collection and usage attributes

Guide for use: CODE 2 Biological children only

A child is considered 'biological' if he/she is the biological child of at least one of

the parents.

CODE 8 Other

'Other' includes families with foster children or other non-biological and non-

adopted children.

CODE 9 Unknown

'Unknown' includes families for whom family composition can not be reported.

Source and reference attributes

Submitting organisation: Australian Institute of Health and Welfare

Steward: Australian Institute of Health and Welfare

Data element attributes

Collection and usage attributes

Guide for use: Family composition is at the time of the placement of the adopted child in to the

adoptive family.

If a family adopted more than one child during the reporting period, the family should be counted separately for each adoption. This includes multiple and serial

adoptions.

The composition of an adoptive family includes both resident and non-resident children. Jurisdictions that do not collect data on non-resident children, should

include a note to this effect.
