Data element attributes

Collection and usage attributes

| | |
|-----------------------|--|
| Guide for use: | Indicate whether the person with cancer has experienced any late effects related to cancer and/or cancer treatment. This does not include issues relating to the recurrence of cancer or progression of the disease. Late effects are as a result of the treatment, the disease process, or both. Examples of late effects relating to cancer are infertility, hyperthyroidism, scoliosis, cognitive impairment and congestive heart failure. |
|-----------------------|--|
