## Collection and usage attributes

**Guide for use:**

The value of the episode end status should guide the selection of the value to be recorded as the end date of a non-admitted patient emergency department service episode as follows:

- If the patient is subsequently admitted to this hospital (including those who are admitted and subsequently die before leaving the emergency department), then record the date the patient's emergency department non-admitted clinical care is completed.
- If the service episode is completed without the patient being admitted, then record the date the patient's emergency department non-admitted clinical care is completed.
- If the service episode is completed and the patient is referred to another hospital for admission, then record the date the patient's emergency department non-admitted clinical care is completed.
- If the patient did not wait, then record the date the patient leaves the emergency department or was first noticed as having left.
- If the patient left at their own risk, then record the date the patient leaves the emergency department or was first noticed as having left.
- If the patient died in the emergency department as a non-admitted patient, then record the date the patient was certified dead.
- If the patient was dead on arrival, then record the date the patient was certified dead.
