Non-admitted patient emergency department service episode—episode end status

Identifying and definitional attributes

Metadata item type:	Data Element Concept
METEOR identifier:	474149
Registration status:	Health , Superseded 20/10/2021 Independent Hospital Pricing Authority , Standard 31/10/2012 National Health Performance Authority (retired) , Retired 01/07/2016 Tasmanian Health , Standard 08/12/2016
Definition:	The status of the patient at the end of the non-admitted patient emergency department service episode.
Context:	Emergency department care.

Object Class attributes

Identifying and definitional attributes

Object class:	Non-admitted patient emergency department service episode
Definition:	The treatment or care between when a patient presents at an emergency department and when the non-admitted patient emergency department clinical care ends.
Context:	Emergency department care.
Specialisation of:	Service episode

Collection and usage attributes

Guide for use:	Includes patients who do not wait for treatment once registered or triaged , and those who are dead on arrival. Both a non-admitted patient emergency department service episode and an admitted patient episode of care should be recorded for patients who subsequently undergo a formal admission. The end of the non-admitted patient emergency department service episode should indicate the commencement of the admitted episode of care, if applicable. A non-admitted patient emergency department service episode ends when either the patient is admitted or, if the patient is not to be admitted, when the patient's emergency department non-admitted clinical care is recorded as completed, or when they are recorded as having left at their own risk.
Comments:	This metadata item has been defined to support the national minimum data set for Non-admitted patient emergency department care.

Source and reference attributes
