# Dwelling—vacancy end date, DDMMYYYY

## Identifying and definitional attributes

<b>Metadata item type:</b>	Data Element
<b>Short name:</b>	Vacancy end date
<b>METEOR identifier:</b>	474746
<b>Registration status:</b>	<a href="#">Housing assistance</a> , Superseded 30/08/2017
<b>Definition:</b>	The date a tenancy agreement for a dwelling commences, thereby ending a period of vacancy, expressed as DDMMYYYY.
<b>Data Element Concept:</b>	<a href="#">Dwelling—vacancy end date</a>
<b>Value Domain:</b>	<a href="#">Date DDMMYYYY</a>

## Value domain attributes

## Representational attributes

<b>Representation class:</b>	Date
<b>Data type:</b>	Date/Time
<b>Format:</b>	DDMMYYYY
<b>Maximum character length:</b>	8

## Source and reference attributes

<b>Submitting organisation:</b>	Australian Institute of Health and Welfare
---------------------------------	--

## Data element attributes

## Collection and usage attributes

<b>Guide for use:</b>	In housing collections the vacancy start and end dates are used to measure the average time taken for tenatable vacant stock to be occupied by a tenant. The vacancy end date is the day that the next household starts their tenancy in the dwelling (i.e. equal to dt_start on the household file). However, if one household's tenancy ends and another household's tenancy starts in the same dwelling on the same day, the vacancy start date should be set equal to the date the previous household ended their tenancy, (i.e. equal to dt_end of the previous household on the household file. Such a vacancy episode has a duration of zero days).
