Service provider organisation—full-time equivalent staff paid peer workers, average NNNN.NN

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Full-time equivalent paid peer workers (average)
METEOR identifier:	481002
Registration status:	Health, Standard 13/11/2014
Definition:	The average number of full-time equivalent staff units paid for all **peer workers** within a service provider organisation.
Data Element Concept:	Service provider organisation—full-time equivalent staff paid peer workers
Value Domain:	Average full-time equivalent staff NNNN.NN

Value domain attributes

Representational attributes

Representation class:	Average
Data type:	Number
Format:	NNNN.NN
Maximum character length:	6
Unit of measure:	Full-time equivalent (FTE) staff

Data element attributes

Collection and usage attributes

Guide for use:

Peer workers are persons are employed (or engaged via contract), either part-time or full-time, on the basis of their lived experience, to provide support to people experiencing a similar situation. This implies the person receives a salary or contract fee on a regular basis. It does not refer to arrangements where the peer support worker only receives reimbursements of expenses or occasional sitting fees for attendance at meetings.

The average is to be calculated from pay period figures. The length of the pay period is assumed to be a fortnight.

Data on full-time equivalent staffing numbers by category should be consistent with data on salaries and wages by staffing category. If the full-time equivalent for contract staff is not collected then salaries for those contract staff should be included in other recurrent expenditure data items.

Where staff provide services to more than one organisation, full-time equivalent staff members should be apportioned between all organisations to which services are provided on the basis of hours paid for in each (salary costs should be apportioned on the same basis).
