Number of visits to a website

Identifying and definitional attributes

Metadata item type: Property

METEOR identifier: 481080

Registration status: [Health](#), Standard 13/11/2014

Definition: A count of visits to a website.

A website visit is a series of page requests from a uniquely identified user of a website within one session. A session ends when more than 30 minutes has elapsed between each page request.

A visit count provides a reliable measure of overall traffic to a website by indicating how many people are accessing pages within and across the website within one session.

Note that a visit can consist of one page view, or many page views.

Property group: [Service provision event](#)
