# Person with cancer—date clinical trial completed, DDMMYYYY

## Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Date clinical trial completed
METEOR identifier:	482206
Registration status:	<a href="#">Health</a> , Standard 14/05/2015
Definition:	The date on which a <a href="#">clinical trial</a> for the treatment of person with cancer is completed, expressed as DDMMYYYY.
Data Element Concept:	<a href="#">Person with cancer—date clinical trial completed</a>
Value Domain:	<a href="#">Date DDMMYYYY</a>

## Value domain attributes

## Representational attributes

Representation class:	Date
Data type:	Date/Time
Format:	DDMMYYYY
Maximum character length:	8

## Source and reference attributes

Submitting organisation:	Australian Institute of Health and Welfare
--------------------------	--

## Data element attributes

## Collection and usage attributes

Guide for use:	<p>A clinical trial is a controlled experiment involving a defined set of subjects and having a clinical event as an outcome measure. It is intended to yield scientifically valid information about the efficacy or safety of a medical intervention such as, for example, a drug, surgical procedure or diagnostic test.</p> <p>Record the date a clinical trial for a person with cancer is completed. If the clinical trial occurs on on a single day the end date should equal the start date.</p> <p>A patient may be offered entry into a clinical trial at any time during the course of illness. Record the date for each trial the patient has entered.</p>
Collection methods:	This information should be sought from the patient's medical record.

## Source and reference attributes

Submitting organisation:	Cancer Australia
