Specialisation of: Person/group of persons

Source and reference attributes

**Submitting organisation:** Australian Institute of Health and Welfare

# Property attributes

### Identifying and definitional attributes

Property: Clinical trial experimental agent or intervention

**Definition:** The experimental agent or intervention used in a <u>clinical trial</u>.

A clinical trial is a controlled experiment involving a defined set of subjects and having a clinical event as an outcome measure. It is intended to yield scientifically valid information about the efficacy or safety of a medical intervention such as, for

example, a drug, surgical procedure or diagnostic test.
