Dwelling—geographic remoteness

Identifying and definitional attributes

Metadata item type:	Data Element Concept
METEOR identifier:	491573
Registration status:	Housing assistance , Superseded 30/08/2017
Definition:	The remoteness of a dwelling, based on the physical road distance to the nearest urban centre and its population size.

Object Class attributes

Identifying and definitional attributes

Object class:	Dwelling
Synonymous names:	Dwelling
METEOR identifier:	268982
Registration status:	Community Services (retired) , Standard 01/03/2005 Housing assistance , Superseded 30/08/2017
Definition:	A structure or a discrete space within a structure intended for people to live in or where a person or group of people live. Thus a structure that people actually live in is a dwelling regardless of its intended purpose, but a vacant structure is only a dwelling if intended for human residence. A dwelling may include one or more rooms used as an office or workshop provided the dwelling is in residential use.
Context:	Dwellings are the main counting unit in the housing sector. Dwellings are reported for a variety of purposes including number of untenable or tenable, and occupied or vacant dwellings. Dwellings may be owned and/or, managed, and/or available for a use by a specific program, including head-leased stock from private and government sources. A dwelling includes a boarding house building and boarding house units .
Specialisation of:	Environmental factors

Collection and usage attributes

Guide for use:	Boarding house rooms or beds are not identified as separate dwellings unless they are self-contained. Self-contained rooms are therefore defined as units and are counted as a separate dwelling. For the public rental housing and state owned and managed Indigenous housing data collections, the number of tenancy (rental) units is used as a proxy for counting the number of dwellings.

Property attributes

Identifying and definitional attributes

Property:	Geographic remoteness
METEOR identifier:	396537

Registration status:	Community Services (retired) , Standard 10/04/2013 Housing assistance , Standard 01/05/2013 Disability , Standard 13/08/2015 Health , Superseded 06/09/2018 Commonwealth Department of Health , Retired 19/10/2023
Definition:	The remoteness of a location, based on the physical road distance to the nearest urban centre and its population size.
Context:	Geographic remoteness is essentially a measure of a physical location's level of access to goods and services. Large population centres tend to have a greater range of goods and services available than small centres. Typically, a population centre is not likely to provide a full range of goods and services until its population reaches around 250,000 people.
Property group:	Location characteristics
