Person with cancer—castrate resistance indicator, yes/no code N

Identifying and definitional attributes

Metadata item type: Data Element

Short name: Castrate resistance indicator

METEOR identifier: 492869

Registration status: Health, Standard 14/05/2015

Definition: An indicator of whether a person with cancer has been found to have castrate

resistance, as represented by a code.

Data element concept attributes

Identifying and definitional attributes

Data element concept: Person with cancer—castrate resistance indicator

METEOR identifier: 492863

Registration status: Health, Standard 14/05/2015

Definition: An indicator of whether a rising prostate-specific antigen (PSA) level, or continued

progression of prostate cancer despite castrate levels of testosterone (<50ng/dL)

has been found, in a person with cancer.

Object class: Person with cancer

Property: <u>Castrate resistance indicator</u>

Source and reference attributes

Submitting organisation: Cancer Australia

Value domain attributes

Identifying and definitional attributes

Value domain: Yes/no code N

METEOR identifier: 270732

Tasmanian Health, Standard 27/05/2020

WA Health, Standard 19/03/2015

Definition: A code set representing 'yes' and 'no'.

Representational attributes

Representation class: Code

Data type: Boolean

Format: N

Maximum character length: 1

Value Meaning

Permissible values: 1 Yes

2 No

Source and reference attributes

Submitting organisation: Australian Institute of Health and Welfare

Data element attributes

Collection and usage attributes

Guide for use: Record whether a person is classed as castrate resistant. Castrate resistance

is indicated by two consecutive rising PSA levels being found in PSA tests that are at least two weeks apart despite castrate levels of testosterone (<50ng/dL).

This element should be recorded in conjunction with <u>Castrate resistance date</u>.
