Establishment—full-time equivalent staff (paid) (mental health consumer and carer workers), average NNNN.NN

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Full-time equivalent staff—mental health consumer and carer workers
METEOR identifier:	494044
Registration status:	Health , Superseded 16/01/2020
Definition:	The average number of full-time equivalent staff units paid for all mental health consumer workers and mental health carer workers within an establishment.

Data element concept attributes

Identifying and definitional attributes

Data element concept:	Establishment—full-time equivalent staff (paid) (mental health consumer and carer workers)
METEOR identifier:	494037
Registration status:	Health , Superseded 16/01/2020
Definition:	The aggregate full-time equivalent staff units paid for all mental health consumer workers and mental health carer workers within an establishment.
Context:	Health expenditure: To assist in analyses of the resource use and activity of health services. Inclusion of these data, classified by staffing category, allows analysis of costs per unit of labour and analysis of staffing inputs against hospital or service unit outputs.
Object class:	Establishment
Property:	Full-time equivalent staff

Value domain attributes

Identifying and definitional attributes

Value domain:	Average full-time equivalent staff NNNN.NN
METEOR identifier:	426709
Registration status:	Health , Standard 07/12/2011
Definition:	A numeric value representing the arithmetic mean of full-time equivalent units.

Representational attributes

Representation class:	Average
Data type:	Number
Format:	NNNN.NN
Maximum character length:	6
Unit of measure:	Full-time equivalent (FTE) staff

Data element attributes

Collection and usage attributes

Guide for use:	Includes mental health consumer workers and mental health carer workers employed by the organisation on a full-time or part-time salaried basis. The average is to be calculated from pay period figures. The length of the pay period is assumed to be a fortnight. If under the relevant award of agreement a full-time nurse is paid for an 80 (ordinary time) hour fortnight, the full-time equivalent for a part-time nurse who works 64 hours is 0.8. If a full-time nurse under the same award is paid for a 100 hours for that fortnight (20 hours overtime), then the full-time equivalent is 100 divided by 80 = 1.25. Data on full-time equivalent staffing numbers by category should be consistent with data on salaries and wages by staffing category. If the full-time equivalent for contract staff is not collected then salaries for those contract staff should be included in other recurrent expenditure data items. Where staff provide services to more than one establishment, full-time equivalent staff members should be apportioned between all establishments to which services are provided on the basis of hours paid for in each (salary costs should be apportioned on the same basis).
Comments:	This metadata item was amended during 1996-97. Until then, both average and end of year counts of full-time equivalent staff were included, and the end of year counts used as surrogates for the average counts if the latter were unavailable. The average count is more useful for accurate analysis of staffing inputs for establishment outputs and for assessments and comparisons of labour costs.
