Mental health non-government organisation establishments NBEDS 2015-

Identifying and definitional attributes

Metadata item type: Data Set Specification

METEOR identifier: 494729

Registration status: Health, Standard 13/11/2014

DSS type: Data Set Specification (DSS)

Scope: The scope of the Mental health non-government organisation establishments

National Best Endeavours Data Set (MH NGOE NBEDS) is mental health-related non-government organisations which provide one or more of the service types

included in the service taxonomy:

- Counselling—face-to-face
- Counselling, support, information and referral—telephone
- · Counselling, support, information and referral—online
- Self-help-online
- Group support activities
- Mutual support and self-help
- Staffed residential services
- Personalised support—linked to housing
- Personalised support—other
- Family and carer support
- Individual advocacy
- Care coordination
- Service integration infrastructure
- · Education, employment and training
- Sector development and representation
- Mental health promotion
- Mental illness prevention

Mental health non-government organisations are private organisations (both not-for-profit and for-profit) that receive Australian and/or state or territory government funding specifically for the provision of services where the principal intent is targeted at improving mental health and well-being and delivered to people affected by mental illness, their families and carers, or the broader community.

These services focus on providing well-being, support and assistance to people who live with a mental illness rather than the assessment, diagnostic and treatment tasks undertaken by clinically focused services.

Collection and usage attributes

Statistical unit: Non-government organisations involved in the provision of mental health care

services.

Collection methods: National reporting arrangements

Data are provided to the Australian Institute of Health and Welfare for national collation, on an annual basis, by government authorities providing funding to non-government organisations specifically for the provision of services where the principal intent is targeted at improving mental health and well-being and delivered to people affected by mental illness, their families and carers, or the broader

community.

Periods for which data are collected and nationally collated

Financial years ending 30 June each year.

Implementation start date: 01/07/2015

Comments: Glossary items

Glossary terms that are relevant to this data set, other than those listed in the Scope section above as part of the mental health non-government organisation

establishments service type taxonomy, are included here.

Mandatory

4 Service provider organisation—number of clients, total N[NNNNN]

Mandatory '

5 Service provider organisation—unique client count accuracy descriptor, code N

Mandatory 1

DSS specific information:

Code 8, 'Unknown count type', is not permitted for this collection.

6 Service provider organisation—number of service contacts, total N[NNNNN]

Mandatory 1

DSS specific information:

A service contact must involve at least two persons, one of whom must be from a <u>mental health-related non-government organisation</u>.

Service contacts are not restricted to in person communication but can include telephone, video link or other forms of direct communication.

Service contacts can either be with a client, or with a third party such as a carer or family member, other professional or mental health worker or other service provider.

A service contact should be recorded for each client for whom the service is provided, regardless of the number of clients or third parties participating.

There may be multiple service contacts on any one day for a client, including contacts involving third parties. If multiple service providers deliver a service contact to the same client concurrently a single service contact should be recorded. If multiple service providers deliver a service contact to the same client sequentially, a service contact should be recorded for each service provider.

Services of an administrative nature are excluded. Examples include telephone contact to schedule an appointment; noting receipt of test results that require no further action; and noting a patient/client did not attend a planned service contact. These instances would not be regarded as service contacts.

In instances where documenting the client's service contact details is separated in time from the service provision, the documenting of the contact details is not counted as a separate service contact.

Travel to or from the location at which the service is provided, for example to or from outreach facilities or private homes, is not to be reported as a service contact.

7 Service provider organisation—number of contact hours, total N[NNNNNN]

Mandatory

DSS specific information:

6 Service provider organisation—number of service contacts, total N[NNNNN]

Mandatory

DSS specific information:

A service contact must involve at least two persons, one of whom must be from a <u>mental health-related non-government organisation</u>.

Service contacts are not restricted to in person communication but can include telephone, video link or other forms of direct communication.

Service contacts can either be with a client, or with a third party such as a carer or family member, other professional or mental health worker or other service provider.

A service contact should be recorded for each client for whom the service is provided, regardless of the number of clients or third parties participating.

There may be multiple service contacts on any one day for a client, including contacts involving third parties. If multiple service providers deliver a service contact to the same client concurrently a single service contact should be recorded. If multiple service providers deliver a service contact to the same client sequentially, a service contact should be recorded for each service provider.

Services of an administrative nature are excluded. Examples include telephone contact to schedule an appointment; noting receipt of test results that require no further action; and noting a patient/client did not attend a planned service contact. These instances would not be regarded as service contacts.

In instances where documenting the client's service contact details is separated in time from the service provision, the documenting of the contact details is not counted as a separate service contact.

Travel to or from the location at which the service is provided, for example to or from outreach facilities or private homes, is not to be reported as a service contact.

7 Service provider organisation—number of contact hours, total N[NNNNNN]
