Birth event—labour onset type, code N

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Labour onset type
Synonymous names:	Onset of labour
METEOR identifier:	495690
Registration status:	Health, Superseded 12/12/2018
Definition:	The manner in which labour started in a birth event, as represented by a code.
Data Element Concept:	Birth event—labour onset type
Value Domain:	Onset of labour code N

Value domain attributes

Representational attributes

Representation class:	Code	
Data type:	Number	
Format:	Ν	
Maximum character length:	1	
	Value	Meaning
Permissible values:	1	Spontaneous
	2	Induced
	3	No labour
Supplementary values:	9	Not stated

Collection and usage attributes

Guide for use:Labour commences at the onset of regular uterine contractions, which act to
produce progressive cervical dilatation, and is distinct from spurious labour or pre-
labour rupture of membranes.If prostaglandins were given to induce labour and there is no resulting labour until
after 24 hours, then code the onset of labour as spontaneous.CODE 3No labour
Can only be associated with a caesarean section.
