National Healthcare Agreement: PI 33-Full time equivalent employed health practitioners per 1,000 population (by age group), 2013

Identifying and definitional attributes

Metadata item type:	Indicator
Indicator type:	Progress measure
Short name:	PI 33-Full time equivalent health workforce, 2013
METEOR identifier:	496813
Registration status:	Health , Superseded 30/04/2014
Description:	Full time equivalent employed health practitioner rate (for the professions of medical practitioners, nurses/midwives and dental practitioners).
Indicator set:	National Healthcare Agreement (2013) Health , Superseded 30/04/2014
Outcome area:	Sustainability Health , Standard 07/07/2010
Data quality statement:	National Healthcare Agreement: PI 33-Full time equivalent employed health practitioners per 1,000 population (by age group), 2013 QS Health , Superseded 14/01/2015

Collection and usage attributes

Computation description: For this indicator, the workforce for each profession is defined as those employed in the profession. This excludes those who are registered in the profession but are retired, working outside the profession, on extended leave of 3 months or more or working outside Australia.

Full time equivalent (FTE) number = Total hours worked by workforce ÷ Standard working week for selected professions.

For the purpose of this indicator, a fulltime working week has been defined as 40 hours for medical practitioners and as 38 hours for dental practitioners and nurses and midwives.

Computation: $1000 \times (\text{Numerator} \div \text{Denominator})$

Numerator: Full-time equivalent (FTE) number in the workforce in the reference year

Comments: Most recent data available for the 2013 Council of Australian Governments (COAG) Reform Council (CRC) report: 2011.

Full time equivalent (FTE) employed health practitioner rates calculated from the National Health Workforce Data Set will be available on a national basis for 2011 and subsequent years.

For medical practitioners, nurses and midwives and dental practitioners, 10-year age groups will be needed to support the disaggregation by state and territory. Age groups are: under 25, 25-34, 35-44, 45-54, 55-64 and 65 or over.

Status of the calculation of fulltime equivalent employed health practitioner rate for professions is:

1. Medical practitioner workforce: Data for 2010 is available but does not include Queensland and Western Australia. Data for 2011 will be available for all states and territories.
2. Nursing and midwifery workforce: Data for 2011 is available, however Western Australia data is incomplete.
3. Dental workforce: Data for 2011 is available.

Representational attributes

Representation class: Rate
Data type: Real
Unit of measure: Person
Format: N[N].N
