**Disaggregation:** 2011-12 - State and territory, by service type, by:

- Indigenous status
- remoteness (Australian Standard Geographical Classification Remoteness Structure)
- Socio-Economic Indexes for Areas (SEIFA) Index of Relative Socio-Economic Disadvantage (IRSD) quintiles

2011-12 - Nationally by service type, by SEIFA IRSD deciles.

2008-09, 2009-10 and 2010-11 - State and territory.

Some disaggregations may result in numbers too small for publication.

**Comments:** Most recent data available for 2013 Council of Australian Governments (COAG) Reform Council (CRC) report: 2011-12.

This indicator needs to be interpreted with care. The measure of 'elapsed time' is utilised because the period of time between the ACAT approval and entry into residential aged care or commencement of CACP; EACH and EACHD may be due to factors which cannot be categorised as 'waiting' time. These include:

- care placement offers that are not accepted
- the availability of alternative community care, informal care and respite services
- variations in care fee regimes that influence client choice of preferred service
- building quality and perceptions about quality of care that influence client choice of preferred service

The measure is most relevant for high residential care recipients as the link between entry to residential care and elapsed time is stronger for high care residents than low care residents or community care packaged recipients. This is due to the urgency for high care residents and the greater number of alternatives for people with ACAT approvals for low care or community aged care packages.

## Representational attributes

**Representation class:** Percentage

**Data type:** Real

**Unit of measure:** Person

**Format:** NN.N

## Accountability attributes

**Reporting requirements:** National Healthcare Agreement

**Organisation responsible for providing data:** Department of Health and Ageing

**Further data development / collection required:** Specification: Minor work required, the measure needs minor work to meet the intention of the indicator.

Consideration to be given to collect "reason for delayed uptake" where elapsed time is greater than 3 months.
