Community housing and Indigenous community housing service provider organisation address details cluster

Identifying and definitional attributes

Metadata item type:	Data Set Specification
METEOR identifier:	497755
Registration status:	Housing assistance , Standard 01/05/2013 Indigenous , Standard 01/05/2013
DSS type:	Data Element Cluster
Scope:	The Community housing and Indigenous community housing address details cluster is used to collect information pertaining to the address of the service providers in the Community Housing DSS and the Indigenous Community Housing DSS.

The fields to be reported for address are:

- Address—road number 1, road number XXXXXX
- Address—road name, text X[44]
- Address—road type, code AA[AA]
- Address—suburb/town/locality name, text X[X(45)]
- Address—Australian postcode, code (Postcode datafile) {NNNN}
- Service provider organisation—Australian state/territory identifier, code N.

All other data elements are to be reported if that data element is a component of the address of the service provider organisation.

Where the given address is a P.O. Box or G.P.O. Box, the road number, road name, and road type should be replaced with the following items:

- Address—postal delivery service type identifier, code AA[A(9)]
- Address—postal delivery number, identifier X[X(10)].

The unstructured address line may be used, if the service provider address does not easily conform to the standard.

---	--

DSS specific information:

The data elements in this cluster provide a detailed description of the individual components used to create a dwelling address as described by AS4590. This cluster enables the collection of street name, street number, suburb, postcode and state/territory identifier.

Additional items have been provided to describe other common aspects of address, such as building or complex name, post office boxes etc., if required.

This collection collected address information in an alternative manner, with a single

40 character alphanumeric field.
