

Community housing and Indigenous community housing service provider organisation address details cluster

Identifying and definitional attributes

Metadata item type: Data Set Specification

METEOR identifier: 497755

Registration status:

- [Housing assistance](#), Standard 01/05/2013
- [Indigenous](#), Standard 01/05/2013

DSS type: Data Element Cluster

Scope: The Community housing and Indigenous community housing address details cluster is used to collect information pertaining to the address of the service providers in the Community Housing DSS and the Indigenous Community Housing DSS.

The fields to be reported for address are:

- Address—road number 1, road number XXXXXX
- Address—road name, text X[44]
- Address—road type, code AA[AA]
- Address—suburb/town/locality name, text X[X(45)]
- Address—Australian postcode, code (Postcode datafile) {NNNN}
- Service provider organisation—Australian state/territory identifier, code N.

All other data elements are to be reported if that data element is a component of the address of the service provider organisation.

Where the given address is a P.O. Box or G.P.O. Box, the road number, road name, and road type should be replaced with the following items:

- Address—postal delivery service type identifier, code AA[A(9)]
- Address—postal delivery number, identifier X[X(10)].

The unstructured address line may be used, if the service provider address does not easily conform to the standard.

Implementation in Data Set Specifications: [Organisation file cluster \(Indigenous community housing\)](#)[Housing assistance](#), Superseded 30/08/2017
[Indigenous](#), Standard 01/05/2013

DSS specific information:

The data elements in this cluster provide a detailed description of the individual components used to create a dwelling address as described by AS4590. This cluster enables the collection of street name, street number, suburb, postcode and state/territory identifier.

Additional items have been provided to describe other common aspects of address, such as building or complex name, post office boxes etc., if required.

This collection collected address information in an alternative manner, with a single 40 character alphanumeric field.

[Organisation file cluster \(Indigenous community housing\)Housing assistance, Standard 30/08/2017](#)

DSS specific information:

The data elements in this cluster provide a detailed description of the individual components used to create a dwelling address as described by AS4590 (Interchange of client information standard). This cluster enables the collection of street name, street number, suburb, postcode and state/territory identifier.

Additional items have been provided to describe other common aspects of address, such as building or complex name, post office boxes etc., if required.

This collection collected address information in an alternative manner, with a single 40 character alphanumeric field.

[Service provider organisation cluster \(Mainstream community housing\)Housing assistance, Superseded 03/07/2014](#)

DSS specific information:

The data elements in this cluster provide a detailed description of the individual components used to create an address as described by AS 4590—2006 Interchange of client information standard.

The collection records address information in an alternative manner, as follows:

- Dwelling address (concatenated number and street name) - 40 character alphanumeric field
- Dwelling suburb -40 character alphanumeric
- Postcode - 4 character numeric and unknown postcodes are recorded as "U".
