Emergency department stay—urgency related group, URG (v1.3) code [X]N[N]

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Urgency related group
Synonymous names:	URG
METEOR identifier:	498030
Registration status:	Health , Standard 07/02/2013 Independent Hospital Pricing Authority , Standard 31/10/2012
Definition:	A patient classification scheme which provides a means of relating the number and types of patients treated in an emergency department , as represented by a code.
Data Element Concept:	Emergency department care—urgency related group
Value Domain:	Urgency Related Group (v1.3) code [X]N[N]

Value domain attributes

Representational attributes

Classification scheme:	Urgency Related Group classification (version 1.3)
Representation class:	Code
Data type:	String
Format:	[X]N[N]
Maximum character length:	3

Source and reference attributes

Submitting organisation:	Independent Hospital Pricing Authority
---------------------------------	--

Data element attributes

Collection and usage attributes

Comments:	<p>The urgency related group (URG) is derived from the urgency disposition group (UDG) which classifies patients into 12 groups based on disposition (admitted or discharged) and urgency (triage category 1-5), including a category for patients who did not wait for treatment as well as a category for patients who died.</p> <p>The URG classification system segments the UDG classification system further by using 26 major diagnostic blocks.</p>
