National Healthcare Agreement: PB d-Better health: by 2018, increase by five percentage points the proportion of Australian adults and children at a healthy body weight, over the 2009 baseline, 2013

Identifying and definitional attributes

Metadata item type: Indicator Indicator type: Indicator

Short name: PB d-By 2018, increase by five percentage points the proportion of Australian

adults and children at a healthy body weight, over the 2009 baseline (Baseline

specification), 2013

METEOR identifier: 498348

Registration status: <u>Health</u>, Superseded 30/04/2014

Description: Proportion of adults and children who are in the 'normal' BMI range.

Indicator set: National Healthcare Agreement (2013)

Health, Superseded 30/04/2014

Outcome area: Prevention

Health, Standard 07/07/2010

Collection and usage attributes

Population group age

from:

5 years

Computation description: Body Mass Index (BMI) is calculated as weight (in kilograms) divided by the square

of height (in metres).

For adults, healthy weight is defined as a BMI of greater than or equal to 18.5 and

less than 25.0.

For children, healthy weight is defined as a 'normal' BMI (appropriate for age and sex), based on centile curves. See ABS National Health Survey: Users' Guide Electronic Publication, 2007–08 (ABS Catalogue no. 4363.0.55.001) for BMI

cutoff values for children.

Rates are directly age-standardised to the 2001 Australian population.

Excludes pregnant women where identified and people with an unknown BMI.

Presented as a percentage.

95% confidence intervals and relative standard errors calculated for rates.

Computation: 100 × (Numerator ÷ Denominator)

Calculated separately for adults and children

Numerator: Adults: Number of persons aged 18 years or over with a healthy body weight.

Children: Number of persons aged 5–17 years with a healthy body weight.

Comments:

Most recent data available for 2013 CRC report: 2011–12.

Baseline: 2007-08

2011–12 national data are based on measured values. BMI derived from measured height and weight is preferable to that derived from self-reported height and weight.

For detailed analysis by Indigenous status, see the *National Indigenous Reform Agreement* (NIRA) report.
