Indigenous primary health care: PI16a-Number of regular clients whose alcohol consumption status has been recorded, 2014

Identifying and definitional attributes

Metadata item type: Indicator

Indicator type: Output measure

Short name: PI16a-Number of regular clients whose alcohol consumption status has been

recorded, 2014

METEOR identifier: 504743

Registration status: Health, Superseded 13/03/2015

Indigenous, Superseded 13/03/2015

Description: Number of regular clients who are Indigenous, aged 15 years and over and who

have had their alcohol consumption status recorded at the primary health care

service within the previous 24 months.

Rationale: It is important to collect information on alcohol consumption because excessive

consumption is associated with health and social problems in all populations,

including the Indigenous population.

Indicator set: Indigenous primary health care key performance indicators (2014)

<u>Health</u>, Superseded 13/03/2015 <u>Indigenous</u>, Superseded 13/03/2015

Collection and usage attributes

Population group age

from

15 years

Computation description: Count of regular clients who are Indigenous, aged 15 years and over and who have

had their alcohol consumption status recorded at the primary health care service

within the previous 24 months.

'Regular client' refers to a client of an OATSIH-funded primary health care service

(that is required to report against the Indigenous primary health care key

performance indicators) who has an active medical record; that is, a client who has attended the OATSIH-funded primary health care service at least 3 times in 2

years.

Alcohol consumption status has been recorded if the health service has either:

a) A record of whether the client consumes alcohol or;

b) A record specifying the amount and frequency of the client's alcohol consumption

Results arising from measurements conducted outside of the service, that are

known by the service, are included in the calculation of this indicator.

Presented as a number.

Computation: Numerator only.

Numerator: Number of regular clients who are Indigenous, aged 15 years and over and who

have had their alcohol consumption status recorded at the primary health care

service within the previous 24 months.

Data custodian

Australian Institute of Health and Welfare.

Accountability attributes

collection required:

Further data development / Additional work is required on an agreed definition for 'alcohol consumption', particularly if this metadata item is to be linked to an indicator of the number or proportion of regular clients recorded as at risk of long-term harm from alcohol

consumption.
