Data element attributes

Collection and usage attributes

Guide for use: The child must have been offered a place and formally enrolled or registered in a preschool program and actively attending to be counted. A child is considered to be actively attending if they:

- attended a preschool program for at least one hour in the reference period
- OR**
- were absent during the reference period due to illness or extended holiday leave but expected to return.

Exclude children who have:

- only completed enrolment procedures at the service
- left the service (e.g. have ceased education or changed services), or have been absent without explanation for four continuous weeks (excluding school vacations) prior to the reference period.

Collection methods: The number of Indigenous children enrolled in a preschool program should be collected for each preschool program available at the service. These data should then be aggregated to the service provider level for reporting purposes.

Each child should be counted only once.

Enrolments in a preschool program should be reported for the specified reference period.

Jurisdictions which adopt a two week reference period are required to derive their data to a representative reference week.
