# Juvenile Justice Charge file cluster

## Identifying and definitional attributes

Metadata item type:	Data Set Specification
METEOR identifier:	512241
Registration status:	<a href="#">Youth Justice</a> , Superseded 23/08/2022
DSS type:	Data Element Cluster
Scope:	The charge file cluster contains data elements relating to young people charged with an offence who are on unsentenced supervised orders.

## Collection and usage attributes

Guide for use:	The charge file contains the Australian and New Zealand Standard Offence Classification (ANZSOC) code of all charges relating to unsentenced supervised orders (e.g. supervised bail, remand).
----------------	--

## Source and reference attributes

Submitting organisation:	Australian Youth Justice Administrators (AYJA)
--------------------------	--

## Relational attributes

Related metadata references:	Has been superseded by <a href="#">Youth Justice Charge file cluster</a> <a href="#">Youth Justice</a> , Superseded 23/08/2022

## Metadata items in this Data Set Specification

Seq No.	Metadata item	Obligation	Max occurs
---------	---------------	------------	------------

- 1
- [Person—person identifier, XXXXXX\[X\(14\)\]](#)

Mandatory 1

**DSS specific information:**

The person identifier is a jurisdictionally-specific code that uniquely identifies a young person (youth justice client) within the State or Territory youth justice department responsible for the young person.

A State or Territory identifier should be the first character of the person identifier according to the following:

- 1 New South Wales
- 2 Victoria
- 3 Queensland
- 4 South Australia
- 5 Western Australia
- 6 Tasmania
- 7 Northern Territory
- 8 Australian Capital Territory
- 9 Other territories (e.g. Christmas Island).

- 2
- [Order—charge identifier, X\[X\(49\)\]](#)

Mandatory 99

**DSS specific information:**

The charge identifier allows for a single charge to be mapped to multiple orders. For example, a young person is charged with a particular offence and is placed on supervised bail. At the next court appearance in relation to this charge, they are remanded into custody. At a later date, an unrelated charge results in the young person being placed on supervised bail.

In the table below, the charge identifier shows that the first two records relate to the same offence, but do not relate to the third record, which has the same charge type but a different order identifier.

Person identifier	Charge identifier	Order identifier	Charge type
1	1	200001	0611
1	1	200056	0611
1	2	200082	0611

- 3
- [Order—charge type, offence code \(ANZSOC 2011\) NN\[NN\]](#)

Mandatory 99

4 [Order—order identifier. X\[X\(49\)\]](#)

Mandatory 99

**DSS specific information:**

For the purposes of the JJ DSS, this unique identifier is retained across collection periods. The identifier is assigned by the State or Territory youth justice department.

This item uniquely identifies each supervised (unsentenced) order. The order identifier links the charge record with an order in the Order file cluster of the JJ NMDS. Each unsentenced supervised order in the Order file should have one or more records in the charge file.

5 [Order—offence identifier. X\[X\(49\)\]](#)

Conditional 99

**Conditional obligation:**

Conditional on a charge resulting in a conviction. If charges cannot be linked with offences, do not supply data for this item.

**DSS specific information:**

The offence identifier (charge file) allows for a charge to be linked with the resulting offence. If charges cannot be linked with offences, do not supply data for this item.

For example, following their first court appearance, a young person is placed on remand for a particular offence (order ID 333). At their second court appearance, they are released on supervised bail (order ID 334). At the third court appearance, the young person is sentenced to a supervised order in relation to the charge. The resulting order is order ID 6 in the order file.

The first record shows that the person was charged with an offence and that the related order is order ID333. The offence ID field is blank because for this order, the charge did not result in a conviction. The second record shows that the charge ID is the same as the first record and so the charge is the same. It requires a new record because the order ID is different. At the end of this order, the charge resulted in a conviction, so the offence ID field contains ID of the corresponding offence record.

Person ID	Charge ID	Charge type	Order ID	Offence ID
1	1	1200	333	
1	1	1200	334	6

If the offence identifier matches the offence identifier of another record for the same person identifier, the offence types must be the same.

**Null values**

Leave the field blank if:

- The offence identifier is unknown
- The offence identifier is not applicable.

Seq No.	Metadata item	Obligation	Max occurs
6	<a href="#">Address—suburb/town/locality name, text X[X(45)]</a>	Mandatory	99
<b>DSS specific information:</b>			
<p>This item is collected for the suburb/town/locality name of the court in which the young person appeared when placed on the order relating to the charge. For police-referred detention, where the young person did not appear in court when being placed on the order, the court location should be reported as 'Not applicable'.</p> <p>Suburb/Town/Locality should be sourced from the Australia Post Standard postcode file for the relevant year, available on the <a href="#">Australia Post website</a>.</p>			
7	<a href="#">Order—court type, code N[N]</a>	Mandatory	99
