## Metadata items in this Data Set Specification

Seq	Metadata item	Obligation	Max occurs
No.			

1 [Person—person identifier, XXXXXX\[X\(14\)\]](#)

Mandatory 1

**DSS specific information:**

The person identifier is a jurisdictionally-specific code that uniquely identifies a young person (youth justice client) within the State or Territory youth justice department responsible for the young person.

A State or Territory identifier should be the first character of the person identifier according to the following:

- 1 = New South Wales
- 2 = Victoria
- 3 = Queensland
- 4 = South Australia
- 5 = Western Australia
- 6 = Tasmania
- 7 = Northern Territory
- 8 = Australian Capital Territory
- 9 = Other territories (e.g. Christmas Island)

2 [Order—offence identifier, X\[X\(49\)\]](#)

Mandatory 99

**DSS specific information:**

The offence identifier allows for a single offence to be mapped to multiple orders.

For example, a young person is serving a sentence in detention for offence type 1350. They are released on parole/supervised release in relation to this offence.

The first record shows the young person was supervised under order ID 12 (the sentenced detention) in relation to offence type 1350. In the second record, the offence is the same as in the first record because a) the offence types are the same and b) the offence ID is the same. A second record is required because the order ID is different (the parole order).

Person ID	Offence ID	Offence type	Order ID
6	1	1350	12
6	1	1350	13

If the offence identifier matches the offence identifier of another record for the same person identifier, the offence types must be the same.

No null values.

- 3
- [Order—offence type, offence code \(ANZSOC 2011\) N\[NNN\]](#)

Mandatory 99

**DSS specific information:**

The offence identifier allows for a single offence to be mapped to multiple orders.

For example, a young person is serving a sentence in detention for offence type 1350. They are released on parole/supervised release in relation to this offence.

The first record shows the young person was supervised under order ID 12 (the sentenced detention) in relation to offence type 1350. In the second record, the offence is the same as in the first record because a) the offence types are the same and b) the offence ID is the same. A second record is required because the order ID is different (the parole order).

Person ID	Offence ID	Offence type	Order ID
6	1	1350	12
6	1	1350	13

If the offence identifier matches the offence identifier of another record for the same person identifier, the offence types must be the same.

No null values.

- 4
- [Order—order identifier. X\[X\(49\)\]](#)

Mandatory 99

**DSS specific information:**

For the purposes of the Juvenile Justice NMDS, this unique identifier is retained across collection periods. The identifier is assigned by the State or Territory youth justice department.

This item uniquely identifies each supervised (sentenced) order. The order identifier links the offence type with an order in the Order file of the JJ NMDS. Each order in the Order file should have one or more records in the Offence file.

- 5
- [Address—suburb/town/locality name, text X\[X\(45\)\]](#)

Mandatory 99

**DSS specific information:**

This item is collected for the court in which the young person appeared when placed on the order relating to the offence.

Suburb/Town/Locality should be sourced from the Australia Post Standard postcode file for the relevant year, available on the [Australia Post website](#).

- 6
- [Order—court type, code N\[N\]](#)

Mandatory 99
