Representation class:	Code
Data type:	Number
Format:	NN[NN]
Maximum character length:	4

Data element attributes

Collection and usage attributes

Guide for use:	<p>The Australian Bureau of Statistics' Australian and New Zealand Standard Offence Classification (ANZSOC) provides a systematic ordering of criminal offences.</p> <p>The ANZSOC contains three levels: divisions (2-digit codes), subdivisions (3-digit codes) and groups (4-digit codes). The group level provides the most information. Where possible, the offence type should be recorded using the 4-digit group code.</p> <p>All offences for which a person is serving a legal order or arrangement should be recorded, not just the most serious offence.</p>
