Order—charge identifier, X[X(49)]

Identifying and definitional attributes

Metadata item type: Data Element

Short name: Charge identifier

METEOR identifier: 512505

Registration status: Youth Justice, Standard 15/02/2022

Definition: An alphanumeric identifier for the charge for which a person is placed on a legal order or arrangement.

Data Element Concept: Order—charge identifier

Value Domain: Identifier X[X(49)]

Value domain attributes

Representational attributes

Representation class: Identifier

Data type: String

Format: X[X(49)]

Maximum character length: 50

Source and reference attributes

Submitting organisation: Australian Institute of Health and Welfare

Data element attributes

Collection and usage attributes

Collection methods: If the charge identifier matches the charge identifier of another record for the same person identifier, the charge types must be the same.

No null values.

Relational attributes

Implementation in Data Set Specifications: Juvenile Justice Charge file cluster
Youth Justice, Superseded 23/08/2022

DSS specific information:

The charge identifier allows for a single charge to be mapped to multiple orders. For example, a young person is charged with a particular offence and is placed on supervised bail. At the next court appearance in relation to this charge, they are remanded into custody. At a later date, an unrelated charge results in the young person being placed on supervised bail.

In the table below, the charge identifier shows that the first two records relate to the same offence, but do not relate to the third record, which has the same charge type but a different order identifier.

Person identifier	Charge identifier	Order identifier	Charge type
1	1	200001	0611

1	1	200056	0611
1	2	200082	0611
