Juvenile Justice Client file cluster

Identifying and definitional attributes

Metadata item type:	Data Set Specification
METEOR identifier:	513199
Registration status:	Youth Justice , Superseded 23/08/2022
DSS type:	Data Element Cluster
Scope:	The Client file cluster contains demographic information on young people under youth justice supervision.

Collection and usage attributes

Guide for use:	The client file contains demographic information on all young people under youth justice supervision in Australia. This information assists with analysing and describing the characteristics of young people under supervision. The person identifier within this file is used to link young people with their legal orders (in the order file cluster) and periods of detention (in the detention file cluster). The linkage between these files allows further analyses of young people under supervision, and the characteristics of their supervision periods.

Mandatory 1

DSS specific information:

This data element is used in the youth justice client file cluster as the date on which the person was first supervised or case managed by the youth justice department (date of first supervised order).

Guide for Use

The date can be before the start of the NMDS (i.e. 1/7/00).

‘Contacts’ are those that would count as a supervised order (i.e. would be within scope for the JJ NMDS).

Do not include court appearances or other types of contacts.

If the first service contact date is unknown, leave the field blank.

Business rules

The first service contact must be on or before the end of the reporting period.

The first service contact date must be before or equal to the earliest [order start date](#) in the JJ NMDS.

The young person's age at the first service contact date (calculated using DOB) should be at least 10 years.
