National Healthcare Agreement: PB b-Better health: halve the mortality gap for Indigenous children under five by 2018, 2014

Identifying and definitional attributes

Metadata item type: Indicator Indicator type: Indicator

Short name: PB b-Halve the mortality gap for Indigenous children under five by 2018, 2014

METEOR identifier: 517701

Registration status: Health, Superseded 14/01/2015

Description: Difference in the mortality rate between Indigenous children aged 0–4 years and

non-Indigenous children aged 0-4 years.

Indicator set: National Healthcare Agreement (2014)

Health, Superseded 14/01/2015

Outcome area: Primary and Community Health

Health, Standard 07/07/2010

Collection and usage attributes

Population group age

Numerator data elements:

from:

0 years

Population group age to: 4 years

Computation description: Presented as number of deaths per 100,000 population

Computation: 100,000 × (Numerator ÷ Denominator)

Variability bands are to be calculated for rates using the following method for

estimating 95% confidence intervals:

 $CI(CR)_{93\%} = CR \pm 1.96 \times \frac{CR}{\sqrt{\sum_{i} d}}$

where d = number of deaths in the relevant age-group

CI = confidence interval

CR = crude rate

Rate ratios and rate differences are calculated for comparing Indigenous and non-

Indigenous Australians.

Numerator: Number of deaths among children aged 0–4 years

Person—age, total years N[NN]

Data Element / Data Set-

Data Source

ABS Death Registrations Collection

Guide for use

Data source type: Administrative by-product data

Denominator: Population aged 0–4 years

Denominator data elements:

- Data Element / Data Set

Data Element

All births that were live born and were not previously registered

Data Source

Data source type: Administrative by-product data

Disaggregation:

2012—Nationally, by Indigenous status.

Some disaggregations may result in numbers too small for publication. Disaggregation by Indigenous status will be based on data only from jurisdictions for which the quality of Indigenous identification is considered acceptable - NSW, Qld, WA, SA and NT.

Disaggregation data elements:

Data Element / Data Set-

Person—Indigenous status, code N

Guide for use

Data source type: Administrative by-product data

Used for disaggregation by state/territory

Comments:

Most recent data available for 2014 Council of Australian Governments (COAG) Reform Council (CRC) report: 2012.

Baseline: 2007.

A system error affected the reporting of WA Aboriginal and Torres Strait Islander death registrations for 2007, 2008 and 2009 which affected the WA and national death rates reported for the 2011 and 2012 CRC reports. These data were revised for 2013 reporting.

Further details (including data for 2002–06) are available from the Aboriginal and Torres Strait Islander Health Performance Framework (Indicator 1.19).
