Metadata items

State owned and managed Indigenous housing (SOMIH) DSS 2011-12

Identifying and definitional attributes

<i>Metadata item type:</i>	Data Set Specification
<i>METeOR identifier:</i>	480485
<i>Registration status:</i>	Housing assistance, Standardisation pending 19/10/2012
<i>DSS type:</i>	Data Set Specification (DSS)
<i>Scope:</i>	<p>The purpose of the State owned and managed Indigenous housing (SOMIH) data set specification is to describe information about tenants in SOMIH dwellings covered by the National Affordable Housing Agreement (NAHA). Included are households residing in SOMIH dwellings where the dwelling is either:</p> <ul style="list-style-type: none">• owned by the housing authority; or leased from the private sector or other housing program areas and used for provision of public rental housing.• SOMIH dwellings leased to other program areas such as community housing or crisis and emergency accommodation programs are not included in this collection. <p>Dwellings no longer under the administration of the property manager/agency at 30 June 2012, (including dwellings demolished, sold or disposed of) and dwellings not yet available to the property manager/agency at 30 June 2012, (such as those still under construction or being purchased) are excluded.</p>

Collection and usage attributes

<i>Statistical unit:</i>	Persons, Households, Dwellings and Vacancy episodes.
<i>Guide for use:</i>	<p>All jurisdictions are asked to supply the single/couple codes in 2011-12 data extractions. Previously, a household's bedroom requirement has been calculated using the Proxy Occupancy Standard (POS), however under NAHA reporting requirements, the match of a dwelling to household size is based on Canadian National Occupancy Standard (CNOS). New low income cut-off measures for low income households based on new definition under NAHA.</p>
<i>Collection methods:</i>	<p>State and territory housing authorities provide the data to the Australian Institute of Health and Welfare for national collation on an annual basis. The SOMIH program is not applicable to Victoria, Western Australia, Australian Capital Territory, and Northern Territory.</p> <p>Include:</p> <ul style="list-style-type: none">• Dwellings headleased from private market or other programs and managed by the jurisdiction. <p>Exclude:</p> <ul style="list-style-type: none">• Dwellings no longer under the administration of the property manager/agent at 30 June 2012.• Dwellings not yet available to the property manager/agency at 30 June 2012, such as those still under construction or being purchased

- Dwellings owned but not administered by the jurisdiction (e.g. leased to other program areas and not administered by state housing authority).

Data qualifications:

- Bedsits are to be reported as 1 bedroom AND counted as 1 bedroom for performance indicator calculations
- Occupied dwellings can be tenantable or untenable.

Implementation start date: 01/07/2011

Implementation end date: 30/06/2012

Dwelling history (housing assistance) cluster

Identifying and definitional attributes

<i>Metadata item type:</i>	Data Set Specification
<i>METeOR identifier:</i>	478915
<i>Registration status:</i>	Housing assistance, Standardisation pending 19/10/2012
<i>DSS type:</i>	Data Element Cluster
<i>Scope:</i>	<p>The Dwelling history cluster describes one record for each vacancy episode during the financial year for dwellings that are occupied or vacant at 30 June, and are managed by the public rental housing and SOMIH programs.</p> <p>Records requested:</p> <p>Include:</p> <ul style="list-style-type: none">• Vacancy episodes from the date the certificate of occupancy was completed for newly constructed dwellings or the date when the keys were received for newly purchased dwellings.• Vacancy episodes of dwellings headleased from private market or other programs used to house public rental housing and SOMIH households and managed by the jurisdiction. <p>Exclude:</p> <ul style="list-style-type: none">• Vacancy episodes of dwellings earmarked for demolition, sale or cancellation, unless subsequently re-tenanted.• Dwellings owned but not administered by the jurisdiction (e.g. leased to other program areas and not administered by state housing authority).

Collection and usage attributes

<i>Collection methods:</i>	<p>Data qualifications:</p> <ul style="list-style-type: none">• Where a dwelling has had a period of vacancy during with more than one vacancy reason the vacancy should be recorded as follows: if a dwelling's vacancy has both 'available to let' (vacancy reason code 1.X) and 'not available to let' (vacancy reason code 2.X) periods it should be recorded as multiple vacancy episodes with the new episode starting each time the reason changes from 1.X to 2.X; if a dwelling's vacancy has multiple contiguous 'available to let' reason periods then they should be recorded as a single vacancy, reporting the vacancy reason as the one that was applicable for the greatest number of days; and if a dwelling's vacancy has multiple contiguous 'not available to let' reason periods then they should be recorded as a single vacancy, reporting the vacancy reason as the one that was applicable for the greatest number of days.• Vacancy start date is generally the day after the previous household has ended their tenancy, i.e. equal to dt_end on the household file. Vacancy end date is the day that the next household starts their tenancy in the dwelling, i.e. equal to dt_start on the household file. However, if one household's tenancy ends and another household's tenancy starts in the same dwelling on the same day, the vacancy
----------------------------	--

start date should be set equal to the date the previous household ended their tenancy, i.e. equal to dt_end of the previous household on the household file. (Such a vacancy episode has duration 0 days.)

- The following formula should be used to calculate the number of vacant days: VACDAYS = (VACEND - VACSTART)
- Dwellings still vacant at 30 June of the current financial year are excluded from P10 calculations. However, jurisdictions must assign a value to VAC_DDV (vacancy reason) for EVERY vacancy episode, both ongoing and non-ongoing.

Comments:

Refer to the collection period of the data set to determine the reference year for this cluster.

Note: The data items VACRSN, VADCESC and VACTYPE have been removed and replaced by a new variable VAC_DDV which is populated with a standard set of vacancy reason codes (see [Dwelling – vacancy reason, code N.N](#)).

As a result of this change the following data elements from the Public Housing 2009-10 DSS and SOMIH 2009-10 DSS have been discontinued.

- [Dwelling – vacancy reason \(jurisdiction\), text \[X\(70\)\]](#)
- [Dwelling – vacancy reason \(jurisdiction\), identifier XXXXXX](#)
- [Dwelling – normal vacancy indicator, yes/no code N](#)

Data set specification specific attributes

State owned and managed Indigenous housing (SOMIH) DSS 2011-12

Conditional obligation: Conditional on the basis of a household tenating a SOMIH dwelling during the collection period.

Waitlist (housing assistance) cluster

Identifying and definitional attributes

<i>Metadata item type:</i>	Data Set Specification
<i>METeOR identifier:</i>	459131
<i>Registration status:</i>	Housing assistance, Candidate 19/10/2012
<i>DSS type:</i>	Data Element Cluster
<i>Scope:</i>	The Waitlist cluster describes all households who were on the public rental housing and SOMIH waitlist as a transfer applicant or new applicant in the financial year. This includes households who are still waiting at June 30th or were first housed during the financial year.

Collection and usage attributes

<i>Statistical unit:</i>	Household
<i>Guide for use:</i>	Include: <ul style="list-style-type: none">• 1 Waitlist applicant – waitlist applicant identifier, X[X(14)] per applicant household per program• 1 record per Waitlist applicant – waitlist applicant identifier, X[X(14)]• Indigenous applicants to be placed under one program (either PH or SOMIH)• New applicants, and• Transfer applicants. Exclude: <ul style="list-style-type: none">• Mutual exchanges, and• Same address transfers.
<i>Comments:</i>	Refer to the collection period of the data set to determine the reference year for this cluster.

Address—Australian postcode, code (Postcode datafile) {NNNN}

Identifying and definitional attributes

<i>Short name:</i>	Australian postcode (address)
<i>METeOR identifier:</i>	429894
<i>Registration status:</i>	Community Services, Standard 06/02/2012 Housing assistance, Standardisation pending 19/10/2012 Health, Standard 07/12/2011 Early Childhood, Standard 09/03/2012 Tasmanian Health, Draft 12/09/2012 Independent Hospital Pricing Authority, Standard 31/10/2012
<i>Definition:</i>	The Australian numeric descriptor for a postal delivery area for an address.
<i>Data Element Concept:</i>	Address – Australian postcode

Value domain attributes

Representational attributes

<i>Classification scheme:</i>	Postcode datafile
<i>Representation class:</i>	Code
<i>Data type:</i>	Number
<i>Format:</i>	{NNNN}
<i>Maximum character length:</i>	4

Data set specification specific attributes

[Dwelling \(housing assistance\) cluster](#)

<i>DSS specific information:</i>	This item is used to collect the dwelling postcode.
----------------------------------	---

Data element attributes

Collection and usage attributes

<i>Guide for use:</i>	<p>Australian postal addresses should include a valid postcode. Refer to the Australia Post Address Presentation Standard for rules on presentation and positioning of postcodes on mail. For a full list of Australian postcodes visit the Australia Post website: www.auspost.com.au</p> <p>This data element may be used in the analysis of data on a geographical basis which involves a conversion from postcodes to the Australian Bureau of Statistics (ABS) postal areas. This conversion results in some inaccuracy of information as postcodes do not have a geographic definition and boundaries are not well defined. However, in some data sets postcode is the only geographic identifier, therefore the use of other more accurate indicators (e.g. Statistical areas - SA) is not always possible.</p> <p>When dealing with aggregate data, postal areas, converted from postcodes, can be mapped to Australian Statistical Geography</p>
-----------------------	---

Standard (ASGS) codes using an ABS concordance, for example to determine SA2s. For a more advanced concordance, locality, postcode and state, which are all part of an address, used in conjunction can effectively code data to the SA1 level and above in the ASGS.

This data element is one of a number of items that can be used to create a primary address, as recommended by the AS 4590-2006 *Interchange of client information* standard. Components of the primary address are:

- Address site (or Primary complex) name
- Address number or number range
- Road name (name/type/suffix)
- Locality
- State/Territory
- Postcode (optional)
- Country (if applicable).

<i>Unit of measure:</i>	Bedroom				

Data set specification specific attributes

[Dwelling \(housing assistance\) cluster](#)

DSS specific information: The supplementary code "999" is not used by this collection.

Data element attributes

Collection and usage attributes

Collection methods: Count bedrooms designed for use as bedrooms and other rooms permanently modified and intended for use as bedrooms (such as a sleep out or built in veranda). Bedsits should be counted as a 1 bedroom dwelling. In the case of **boarding house buildings**, the unit of counting is the **boarding house room** which usually has only one bedroom.

Where reporting the number of bedrooms at the tenancy level, the number of bedrooms should be reported for each tenancy rental unit.

Identifying and definitional attributes

<i>Short name:</i>	Vacant days
<i>METeOR identifier:</i>	459071
<i>Registration status:</i>	Housing assistance, Standardisation pending 19/10/2012
<i>Definition:</i>	The total number of days a dwelling is untenanted.
<i>Data Element Concept:</i>	Dwelling – number of days vacant

Value domain attributes

Representational attributes

<i>Representation class:</i>	Total
<i>Data type:</i>	Number
<i>Format:</i>	N[NNN]
<i>Maximum character length:</i>	4
<i>Unit of measure:</i>	Day

Data element attributes

Collection and usage attributes

<i>Guide for use:</i>	In housing assistance a vacancy episode occurs when a dwelling is untenanted, but is available to be tenanted. The number of days in each vacancy episode is calculated by subtracting the date the dwelling was last occupied from the date the dwelling was first vacated. The vacancy start date is generally the day after the previous household has ended their tenancy, i.e. equal to <i>Dwelling – vacancy start date, DDMMYYYY</i> on the Household (housing assistance) cluster. The vacancy end date is the day that the next household starts their tenancy in the dwelling, i.e. equal to <i>Dwelling – vacancy end date, DDMMYYYY</i> of the previous household.

Collection and usage attributes

<i>Guide for use:</i>	CODE 9 Not stated/ inadequately described This code is not for use in primary data collections.
-----------------------	--

Data element attributes

Collection and usage attributes

<i>Guide for use:</i>	<p>Code 1. Yes: A household has a formal tenancy agreement for a particular dwelling. Occupied dwellings include any structures that people actually live in regardless of its intended purpose. The structure may or may not be tenatable.</p> <p>Code 2. No: No formal tenancy agreement exists between a household and a housing provider for a particular dwelling. A not occupied structure is only a dwelling if it is intended for human residence. The structure may or may not be tenatable. Thus a shed, garage, office, etc. is counted as an occupied dwelling if people are living there, but is not counted as vacant if there are no residents as the purpose of the structure is not for human habitation.</p>

<i>Supplementary values:</i>	99 Not stated/inadequately described																				

Collection and usage attributes

<i>Guide for use:</i>	<p>Code 1. Separate house: a house separated from other houses (or other buildings or structures) by space to allow access on all sides (at least 1/2 a metre). This category also includes houses which have an attached flat (e.g. a granny flat). The attached flat will be included in the 'Flat, unit or apartment' category.</p> <p>Code 2. Semi-detached, row or terrace house, townhouse, etc.: includes dwellings with their own private grounds and no dwelling above or below. A key feature of these dwellings is that they are either attached in some structural way to one or more dwellings or are separated from neighbouring dwellings by less than 1/2 a metre. Examples include semi-detached, row or terrace houses, townhouses, and villa units. Multi-storey townhouses or units are separately identified from those which are single storey.</p> <p>Code 3. Flat, unit or apartment: includes dwellings in blocks of</p>
-----------------------	--

flats, units or apartments that are self-contained. These dwellings do not have their own private grounds and usually share a common entrance foyer or stairwell. This category includes houses converted into flats, and flats attached to houses such as granny flats.

Code 4. Caravan, tent, cabin etc. in caravan park, houseboat in marina, etc.: includes all types of accommodation within a caravan park. It also includes all occupied water craft in marinas.

Code 5. Caravan not in caravan park, houseboat not in marina, etc.: includes all mobile units, on water or land, occupied on a permanent or semi-permanent basis by people (e.g. caravans, campervans, mobile houses, small boats, houseboats) that are not in caravan parks or marinas.

Code 6. Improvised home, tent, sleepers out: includes all structures not elsewhere classified that are occupied by people on a permanent or semi-permanent basis. This category typically includes garages, sheds, tents, shacks, etc. These structures are only included in this category if they are not in a caravan park.

Code 7. House or flat attached to a shop, office, etc.: includes all houses or flats that are attached to a non-residential building. Examples of these dwellings are manses attached to a church, a flat or apartment over a shop, and a caretaker's house or flat attached to a school, factory or storage facility.

Code 8. Boarding/rooming house unit: a **boarding/rooming house unit** is a self-contained unit within a boarding house with separate cooking, bathroom, and toilet facilities. Boarding house units are usually accessed via a common entrance such as a foyer or hallway. Please note: this structure type identifies the individual rooms in a boarding/rooming house, not the complete building.

Comments:

Dwelling—vacancy end date, DDMMYYYY

Identifying and definitional attributes

<i>Short name:</i>	Vacancy end date
<i>METeOR identifier:</i>	474746
<i>Registration status:</i>	Housing assistance, Standardisation pending 19/10/2012
<i>Definition:</i>	The date a tenancy agreement for a dwelling commences, thereby ending a period of vacancy, expressed as DDMMYYYY.
<i>Data Element Concept:</i>	Dwelling – vacancy end date

Value domain attributes

Representational attributes

<i>Representation class:</i>	Date
<i>Data type:</i>	Date/Time
<i>Format:</i>	DDMMYYYY
<i>Maximum character length:</i>	8

Data element attributes

Collection and usage attributes

<i>Guide for use:</i>	In housing collections the vacancy start and end dates are used to measure the average time taken for tenantable vacant stock to be occupied by a tenant. The vacancy end date is the day that the next household starts their tenancy in the dwelling (i.e. equal to dt_start on the household file). However, if one household's tenancy ends and another household's tenancy starts in the same dwelling on the same day, the vacancy start date should be set equal to the date the previous household ended their tenancy, (i.e. equal to dt_end of the previous household on the household file. Such a vacancy episode has a duration of zero days).

----------------------------------	--

Data element attributes

Collection and usage attributes

<i>Guide for use:</i>	This data element is used in the context of the waitlist
-----------------------	--

population. It should be used in conjunction with *Household – application date, DDMMYYYY* to determine those who have been deemed eligible for services and who are waiting to be allocated to public rental housing or state owned and managed Indigenous housing.

The waiting list population refers to applicants who are still:

- residing in the state of application;
- eligible for assistance; and
- wishing to pursue their application.

Potential applicants still awaiting eligibility assessment are excluded.

Collection methods:

Households that applied for a transfer and received housing assistance for that financial year should be counted. This includes households that wish to transfer to another dwelling for reasons other than applying for assistance different from what they currently receive.

Include applications from those who have been assisted by another program such as temporary or crisis accommodation while waiting for housing assistance.

Mutual exchanges and same address transfers are excluded from the count of total number of applicant households on the waiting list.

In the public rental housing and state owned and managed Indigenous housing data collections this metadata item is measured over a financial year.

Collection and usage attributes

<i>Guide for use:</i>	<p>Code 1 Homeless</p> <p>Homeless, for the purpose of the priority access national standard, is defined as a household with no housing or a household residing in temporary or emergency accommodation at the time of housing allocation. It includes households who:</p> <ul style="list-style-type: none">• lived in accommodation provided by a Supported Accommodation Assistance Program (SAAP) agency or some other form of emergency accommodation;• were totally without permanent shelter (e.g. wandered from place to place, slept out on the street or on park benches);• lived in shelter that was unlawful such as those who were forced to squat in derelict buildings; or• stayed temporarily with friends or relatives in the short term (e.g. up to a maximum of 6 weeks duration). <p>Code 2 Life or safety was at risk in their accommodation</p> <p>This includes situations where people were:</p> <ul style="list-style-type: none">• subject to domestic violence; or• subject to sexual/emotional abuse; or subject to child abuse; or at risk of violence or who feared for their safety in the
-----------------------	---

home environment.

- Violence is defined as any incident involving the occurrence, attempt or threat of either physical or sexual assault. Physical assault involves the use of physical force with the intent to harm or frighten a person. The threat to harm should only be included if it is believed the harm is likely to be carried out. Sexual assault includes acts of a sexual nature against a person's will through the use of physical force, intimidation or coercion, or any attempts to do this.

Code 3 Health condition aggravated by housing:

It includes people who lived in the following situations:

- Medical condition or **disability** which rendered their housing unsuitable (e.g. disabled person who required modified accommodation, elderly persons who were housebound due to mobility problems in highset dwellings); appropriate housing stock was either not available, or not available at an affordable cost, in the private rental market (e.g. dwellings with appropriate modifications for a person with a disability); a health condition or disability which was caused or exacerbated by the living situation.

Code 4 Housing inappropriate to needs:

This category captures housing situations that indicate a person did not have access to safe and secure housing at the time of allocation and these situations are not included in categories 1 to 3 above (people with housing affordability issues are captured in category 5). Inappropriate housing includes persons who:

- lived in poor housing locations that resulted in isolation from community services, social networks and support systems, and these services and supports were necessary to maintain independent living. This category includes families that were divided due to their housing situation; or lived in overcrowded situations where an additional two bedrooms was required for adequate housing according to the **proxy occupancy standard**; or were unable to access accommodation in the private rental market due to discrimination. Discrimination refers to a person who was treated unfairly because they belonged to a particular group of people. Types of discrimination include: sex; race; age; marital status; sexual orientation; or disability (Anti-discrimination Board); or lived in situations where their tenure was insecure and they had received an eviction notice (either written or verbal) and they had no access to adequate legislative protection; or lived in housing that had severe structural or other maintenance problems (e.g. property had been declared unfit for human habitation, severe dampness, lacked essential facilities such as cooking or bathroom).

Code 5 Very high housing costs:

This category identifies households that paid 41% or more of their income in rent at the time of housing allocation. This definition is not intended to suggest that households paying between 30-41% of income on rent live in affordable housing situations. The definition aims to capture the group of the

population who experience the more severe end of housing affordability problems and the group for which literature suggests are least able to decrease their housing costs.

Data set specification specific attributes

[Waitlist \(housing assistance\) cluster](#)

DSS specific information: Greatest need reason is only recorded if the household has been identified as a greatest need household.

Data element attributes

Collection and usage attributes

Collection methods: More than one greatest need reason can be recorded for a household.
In counting the total number of greatest need households, each household should only be counted once.

Comments: The definition of 'homeless' used here for the priority access national standard is different to the SAAP **Homeless** definition. It should be noted that as housing assistance allocation practices vary across:

- states and territories within a collection
- across data collections within states and territories

caution should be used when interpreting information and/or making comparisons in relation to this metadata item.

DSS specific information: The Public Rental Housing and SOMIH collections do not collect Indigenous status according to the ABS standard. The following table describes the values used to record Indigenous status for these collections, and demonstrate that a one to one relationship cannot be made to the standard.

Standard METeOR Value	Standard METeOR Label	PRH/SOMIH Value	PRH/SOMIH Label
1	Aboriginal but not Torres Strait Islander	1	Indigenous (not further defined)
2	Torres Strait Islander but not Aboriginal	1	Indigenous (not further defined)
3	Both Aboriginal and Torres Strait Islander	1	Indigenous (not further defined)

4	Neither Aboriginal nor Torres Strait Islander	2	Neither Aboriginal or Torres Strait Islander
9	Not stated/Inadequately described	9	Not stated/Inadequately described

Data element attributes

Collection and usage attributes

Guide for use:

CODE 1 YES

Record if any member of the household identifies as Indigenous.

CODE 2 NO

Record if no members of the household identifies as Indigenous.

An Indigenous household is one which contains one or more Indigenous people.

This definition may not be consistent with eligibility requirements for assistance targeted to Indigenous people under a specific program. For example, some programs specify that there must be an Indigenous person aged 15 or over to be classified as an Indigenous household.

A household excludes visitors to a household.

Comments:

Together with **family**, household is considered one of the basic groups of social aggregation. Information on household numbers and composition aids in identifying groups within the population such as Indigenous households or the number of people living alone.

Australia's Aboriginal and Torres Strait Islander peoples occupy a unique place in Australian society and culture. In the current climate of reconciliation, accurate and consistent statistics about Aboriginal and Torres Strait Islander peoples are needed in order to plan, promote and deliver essential services, to monitor changes in wellbeing and to account for government expenditure in this area.

Person—date of birth, DDMMYYYY

Identifying and definitional attributes

<i>Short name:</i>	Date of birth
<i>METeOR identifier:</i>	287007
<i>Registration status:</i>	Community Services, Standard 25/08/2005 Housing assistance, Standard 20/06/2005 Health, Standard 04/05/2005 Early Childhood, Standard 21/05/2010 Homelessness, Standard 23/08/2010 Tasmanian Health, Draft 23/07/2012 WA Health, Draft 23/08/2012 Independent Hospital Pricing Authority, Standard 01/11/2012 Indigenous, Draft 18/10/2012
<i>Definition:</i>	The date of birth of the person.
<i>Data Element Concept:</i>	Person— date of birth

Value domain attributes

Representational attributes

<i>Representation class:</i>	Date
<i>Data type:</i>	Date/Time
<i>Format:</i>	DDMMYYYY
<i>Maximum character length:</i>	8

Data element attributes

Collection and usage attributes

<i>Guide for use:</i>	<p>If date of birth is not known or cannot be obtained, provision should be made to collect or estimate age. Collected or estimated age would usually be in years for adults, and to the nearest three months (or less) for children aged less than two years. Additionally, an estimated date flag or a date accuracy indicator should be reported in conjunction with all estimated dates of birth.</p> <p>For data collections concerned with children's services, it is suggested that the estimated date of birth of children aged under 2 years should be reported to the nearest 3 month period, i.e. 0101, 0104, 0107, 0110 of the estimated year of birth. For example, a child who is thought to be aged 18 months in October of one year would have his/her estimated date of birth reported as 0104 of the previous year. Again, an estimated date flag or date accuracy indicator should be reported in conjunction with all estimated dates of birth.</p>
<i>Collection methods:</i>	<p>Information on date of birth can be collected using the one question:</p> <p>What is your/(the person's) date of birth?</p> <p>In self-reported data collections, it is recommended that the following response format is used:</p> <p>Date of birth: __ / __ / ----</p>

This enables easy conversion to the preferred representational layout (DDMMYYYY).

For record identification and/or the derivation of other metadata items that require accurate date of birth information, estimated dates of birth should be identified by a date accuracy indicator to prevent inappropriate use of date of birth data. The linking of client records from diverse sources, the sharing of patient data, and data analysis for research and planning all rely heavily on the accuracy and integrity of the collected data. In order to maintain data integrity and the greatest possible accuracy an indication of the accuracy of the date collected is critical. The collection of an indicator of the accuracy of the date may be essential in confirming or refuting the positive identification of a person. For this reason it is strongly recommended that the data element Date – accuracy indicator, code AAA also be recorded at the time of record creation to flag the accuracy of the data.

Comments:

Privacy issues need to be taken into account in asking persons their date of birth.

Wherever possible and wherever appropriate, date of birth should be used rather than age because the actual date of birth allows a more precise calculation of age.

When date of birth is an estimated or default value, national health and community services collections typically use 0101 or 0107 or 3006 as the estimate or default for DDMM.

It is suggested that different rules for reporting data may apply when estimating the date of birth of children aged under 2 years because of the rapid growth and development of children within this age group which means that a child's development can vary considerably over the course of a year. Thus, more specific reporting of estimated age is suggested.

<i>Maximum character length:</i>	1								
<i>Permissible values:</i>	<table><thead><tr><th>Value</th><th>Meaning</th></tr></thead><tbody><tr><td>1</td><td>Single status OR couple relationship with non-household member</td></tr><tr><td>2</td><td>Couple relationship with another household member (de facto or married)</td></tr><tr><td>9</td><td>Not stated/Inadequately described</td></tr></tbody></table>	Value	Meaning	1	Single status OR couple relationship with non-household member	2	Couple relationship with another household member (de facto or married)	9	Not stated/Inadequately described
Value	Meaning								
1	Single status OR couple relationship with non-household member								
2	Couple relationship with another household member (de facto or married)								
9	Not stated/Inadequately described								
<i>Supplementary values:</i>									

Data element attributes

Collection and usage attributes

Guide for use: A relationship status is assigned to each member of the household, including children.

CODE 1 Single status OR couple relationship with non-household member

This code includes individuals that identify as being single, and those that are involved in a couple relationship but the partner is not a member of the household (ie. not nominated on the tenancy agreement).

CODE 2 Couple relationship with another household member

This code includes individuals that identify as being in a couple relationship, and live in the same dwelling (ie. both nominated as a household member on the tenancy agreement).

CODE 9 Not stated/Inadequately described

This code is not for use in primary data collections.

Comments: This item is used to determine whether overcrowding exists in a dwelling, under the Canadian National Occupancy Standard (CNOS). CNOS guidelines use age, sex and relationship status of the tenants and number of bedrooms in the dwelling, to determine whether the household is overcrowded.
The standard specifies:

- no more than two people shall share a bedroom
- parents or couples may share a bedroom
- children under 5 years, either of the same sex or opposite sex may share a bedroom
- children under 18 years of the same sex may share a bedroom
- a child aged 5 to 17 years should not share a bedroom with a child under 5 of the opposite sex
- single adults 18 years and over and any unpaired children require a separate bedroom.

If the total number of bedrooms required by a household exceeds the number of bedrooms available to the household by one or more, then the household is deemed overcrowded.

Collection and usage attributes

<i>Guide for use:</i>	<p>This metadata item is based on the Australian Bureau of Statistics (ABS) standard for Indigenous status. For detailed advice on its use and application please refer to the ABS Website as indicated in the Reference documents.</p> <p>The classification for Indigenous status has a hierarchical structure comprising two levels. There are four categories at the detailed level of the classification which are grouped into two categories at the broad level. There is one supplementary category for 'not stated' responses. The classification is as follows:</p> <p>Indigenous:</p> <ul style="list-style-type: none">• Aboriginal but not Torres Strait Islander origin.• Torres Strait Islander but not Aboriginal origin.• Both Aboriginal and Torres Strait Islander origin. <p>Non-Indigenous:</p>
-----------------------	--

- Neither Aboriginal nor Torres Strait Islander origin.

Not stated/ inadequately described:

This category is not to be available as a valid answer to the questions but is intended for use:

- Primarily when importing data from other data collections that do not contain mappable data.
- Where an answer was refused.
- Where the question was not able to be asked prior to completion of assistance because the client was unable to communicate or a person who knows the client was not available.

Only in the last two situations may the tick boxes on the questionnaire be left blank.

Data set specification specific attributes

Person (housing assistance) cluster

DSS specific information: The Public Housing and SOMIH collections do not collect Indigenous status according to the ABS standard. The values collected do not form a one-to-one relationship with the standard, as shown in the table below:

Standard METeOR Value	Standard METeOR Label	PH/SOMIH Value	PH/SOMIH Label
1	Aboriginal but not Torres Strait Islander	1	Indigenous (not further defined)
2	Torres Strait Islander but not Aboriginal	1	Indigenous (not further defined)
3	Both Aboriginal and Torres Strait Islander	1	Indigenous (not further defined)
4	Neither Aboriginal nor Torres Strait Islander	2	Neither Aboriginal or Torres Strait Islander
9	Not stated/Inadequately described	9	Not stated/Inadequately described

Data element attributes

Collection and usage attributes

Collection methods: The standard question for Indigenous Status is as follows:
 [Are you] [Is the person] [Is (name)] of Aboriginal or Torres Strait Islander origin?
 (For persons of both Aboriginal and Torres Strait Islander origin, mark both 'Yes' boxes.)
 No.....
 Yes, Aboriginal.....

Yes, Torres Strait Islander.....

This question is recommended for self-enumerated or interview-based collections. It can also be used in circumstances where a close relative, friend, or another member of the household is answering on behalf of the subject. It is strongly recommended that this question be asked directly wherever possible.

When someone is not present, the person answering for them should be in a position to do so, i.e. this person must know well the person about whom the question is being asked and feel confident to provide accurate information about them.

This question must always be asked regardless of data collectors' perceptions based on appearance or other factors.

The Indigenous status question allows for more than one response. The procedure for coding multiple responses is as follows:

If the respondent marks 'No' and either 'Aboriginal' or 'Torres Strait Islander', then the response should be coded to either Aboriginal or Torres Strait Islander as indicated (i.e. disregard the 'No' response).

If the respondent marks both the 'Aboriginal' and 'Torres Strait Islander' boxes, then their response should be coded to 'Both Aboriginal and Torres Strait Islander Origin'.

If the respondent marks all three boxes ('No', 'Aboriginal' and 'Torres Strait Islander'), then the response should be coded to 'Both Aboriginal and Torres Strait Islander Origin' (i.e. disregard the 'No' response).

This approach may be problematical in some data collections, for example when data are collected by interview or using screen based data capture systems. An additional response category

Yes, both Aboriginal and Torres Strait Islander...

may be included if this better suits the data collection practices of the agency or establishment concerned.

Comments:

The following definition, commonly known as 'The Commonwealth Definition', was given in a High Court judgement in the case of *Commonwealth v Tasmania* (1983) 46 ALR 625.

'An Aboriginal or Torres Strait Islander is a person of Aboriginal or Torres Strait Islander descent who identifies as an Aboriginal or Torres Strait Islander and is accepted as such by the community in which he or she lives'.

There are three components to the Commonwealth definition:

- descent;
- self-identification; and
- community acceptance.

In practice, it is not feasible to collect information on the community acceptance part of this definition in general purpose statistical and administrative collections and therefore standard questions on Indigenous status relate to descent and self-identification only.

Collection and usage attributes

<i>Guide for use:</i>	Only the usual residents of the household are included. Code 1. Reference person: may be referred to as <i>person 1, main tenant or tenant 1, principal tenant, household head</i> on application or tenancy forms, or where the dwelling is being purchased, referred to as the <i>mortgagee</i> . Person must be aged 16 or over. Code 2. Spouse/partner: include defacto, wife, husband and partner of the reference person/tenant. Codes 3 and 4. Son/daughter: include the son(s) or daughter(s) (or step son(s)/daughter(s)) of the reference person and/or spouse. Codes 5 and 6. Resident: include relatives other than son(s)/daughter(s) (step son(s)/daughter(s)), non-related carer, other non-related and non-family member(s).

Collection and usage attributes

<i>Guide for use:</i>	Diagnosis and procedure codes should be checked against the national ICD-10-AM sex edits, unless the person is undergoing, or has undergone a sex change or has a genetic condition resulting in a conflict between sex and ICD-10-AM code. CODE 3 Intersex or indeterminate Intersex or indeterminate, refers to a person, who because of a genetic condition, was born with reproductive organs or sex chromosomes that are not exclusively male or female or whose sex has not yet been determined for whatever reason. Intersex or indeterminate, should be confirmed if reported for people aged 90 days or greater.
<i>Comments:</i>	The definition for Intersex in Guide for use is sourced from the ACT Legislation (Gay, Lesbian and Transgender) Amendment Act 2003.

Data element attributes

Collection and usage attributes

Collection methods:

Operationally, sex is the distinction between male and female, as reported by a person or as determined by an interviewer. When collecting data on sex by personal interview, asking the sex of the respondent is usually unnecessary and may be inappropriate, or even offensive. It is usually a simple matter to infer the sex of the respondent through observation, or from other cues such as the relationship of the person(s) accompanying the respondent, or first name. The interviewer may ask whether persons not present at the interview are male or female.

A person's sex may change during their lifetime as a result of procedures known alternatively as sex change, gender reassignment, transsexual surgery, transgender reassignment or sexual reassignment. Throughout this process, which may be over a considerable period of time, the person's sex could be recorded as either Male or Female.

In data collections that use the ICD-10-AM classification, where sex change is the reason for admission, diagnoses should include the appropriate ICD-10-AM code(s) that clearly identify that the person is undergoing such a process. This code(s) would also be applicable after the person has completed such a process, if they have a procedure involving an organ(s) specific to their previous sex (e.g. where the patient has prostate or ovarian cancer).

CODE 3 Intersex or indeterminate

Is normally used for babies for whom sex has not been determined for whatever reason.

Should not generally be used on data collection forms completed by the respondent.

Should only be used if the person or respondent volunteers that the person is intersex or where it otherwise becomes clear during the collection process that the individual is neither male nor female.

CODE 9 Not stated/inadequately described

Is not to be used on primary collection forms. It is primarily for use in administrative collections when transferring data from data sets where the item has not been collected.

DSS specific information: The code set values 3, 3.1, 3.2, and 3.3 are not valid for this collection.

Data element attributes

Collection and usage attributes

Guide for use: All sources of cash income are included in this concept. Cash income may be received from employment (Employee cash income), as a profit or loss from an unincorporated enterprise (**Unincorporated business** cash income), from the ownership of assets (Property cash income). Income may also be derived from current transfers from government (pensions and benefits) or from private sources, such as superannuation funds. An individual may receive cash income from more than one source.

Excluded from this concept is income in kind e.g. barter for goods or services.

Income source is used to derive low income status of households and whether they may be eligible to receive Commonwealth rent assistance if the same household was living in the private rental market.

Collection methods: If the person has multiple sources of income, all sources should be counted.

This question is not asked of persons aged less than 15 years because they are generally dependants.

Dwelling

Identifying and definitional attributes

<i>Metadata item type:</i>	Object Class
<i>Synonymous names:</i>	Dwelling
<i>METeOR identifier:</i>	268982
<i>Registration status:</i>	Community Services, Standard 01/03/2005 Housing assistance, Standard 01/03/2005
<i>Definition:</i>	A structure or a discrete space within a structure intended for people to live in or where a person or group of people live. Thus a structure that people actually live in is a dwelling regardless of its intended purpose, but a vacant structure is only a dwelling if intended for human residence. A dwelling may include one or more rooms used as an office or workshop provided the dwelling is in residential use.
<i>Context:</i>	Dwellings are the main counting unit in the housing sector. Dwellings are reported for a variety of purposes including number of untenanted or tenanted, and occupied or vacant dwellings. Dwellings may be owned and/or, managed, and/or available for a use by a specific program, including headleased stock from private and government sources. A dwelling includes a boarding house building and boarding house units .
<i>Specialisation of:</i>	Environmental factors

Collection and usage attributes

<i>Guide for use:</i>	Boarding house rooms or beds are not identified as separate dwellings unless they are self-contained. Self-contained rooms are therefore defined as units and are counted as a separate dwelling. For the public rental housing and state owned and managed Indigenous housing data collections, the number of tenancy (rental) units is used as a proxy for counting the number of dwellings.

Household

Identifying and definitional attributes

<i>Metadata item type:</i>	Object Class
<i>METeOR identifier:</i>	268977
<i>Registration status:</i>	Community Services, Superseded 27/04/2007 Housing assistance, Standard 01/03/2005 Health, Standard 04/05/2005
<i>Definition:</i>	A group of two or more related or unrelated people who usually reside in the same dwelling, and who make common provision for food or other essentials for living. Or a single person living in a dwelling who makes provision for his or her own food and other essentials for living, without combining with any other person.
<i>Context:</i>	Together with family, household is considered one of the basic groups of social aggregation. Information on household numbers and composition aids in identifying groups within the population such as Indigenous households or the number of people living alone.
<i>Specialisation of:</i>	Person/group of persons

Collection and usage attributes

<i>Guide for use:</i>	For housing data collections, the number of tenancy agreements is a practical proxy for calculating the number of households receiving housing assistance. The persons in the group may pool their incomes and have a common budget to a greater or lesser extent: they may be related or unrelated persons, or a combination of both. Only usual residents of the household are included as members of the household. Visitors to a household are, by definition, excluded from the household.

Income unit

Identifying and definitional attributes

<i>Metadata item type:</i>	Object Class
<i>Synonymous names:</i>	Income unit
<i>METeOR identifier:</i>	268986
<i>Registration status:</i>	Community Services, Standard 31/08/2007 Housing assistance, Standard 01/03/2005
<i>Definition:</i>	One person or a group of related persons within a household, whose command over income is shared, or any person living in a non private dwelling who is in receipt of personal income.
<i>Context:</i>	Income units are restricted to relationships of marriage (registered or de facto) and of parent/ dependant who usually reside in the same household. This means that an income unit can be defined as: <ul style="list-style-type: none">• a married couple or sole parent, and dependent children only; or• a married couple only with no dependent children present; or• a person who is not related to any other household member either by marriage or by the parent/dependant relationship. This is the standard statistical unit for analyses of economic wellbeing, and can be an important measure in assessing the needs and circumstances of individuals and families.

Service event

Identifying and definitional attributes

<i>Metadata item type:</i>	Object Class
<i>METeOR identifier:</i>	320989
<i>Registration status:</i>	Community Services, Standard 07/03/2006 Housing assistance, Standard 23/08/2010 Homelessness, Standard 23/08/2010
<i>Definition:</i>	An instance or occasion of assistance received by a client from a service provider.
<i>Context:</i>	<p>Information about individual instances of the receipt of assistance by a client from a service agency is of fundamental interest to service providers, but may or may not be required for national reporting purposes. However, information about an individual service event is a basic building block for other information that is of relevance to national reporting and statistical analysis. For example, if information about the length of time that certain types of persons have received particular types of assistance from specific types of agencies is required, then information about each instance of service provision should be recorded in a standard way. This should enable reliable, valid and comparable data to be reported nationally.</p> <p>Generally, a service event is described by a cluster of data elements that provide information about when it happened, where it happened, what assistance was received, how much and from whom. The need for information about service events reflects an interest in locating community service assistance to clients in time. This information may help to identify the intensity of assistance received by a person during a time period. Knowing when a person received assistance from an agency also helps to identify those records that are of interest to particular data collections. For example, an agency may be required to report on all assistance provided to clients during, say 1999-2000.</p> <p>As with the definition of <i>client</i>, what constitutes a <i>service event</i> is influenced by the definition of 'assistance'. That is, every interaction between an agency and a client may not be considered of sufficient significance to warrant recording as a <i>service event</i>. Furthermore, decisions about what is included or excluded from the definition of 'assistance' may be affected by specific program requirements as well as practical considerations related to the amount of time and resources it takes to record every interaction between an agency and a client.</p>

Boarding house building

Identifying and definitional attributes

<i>Metadata item type:</i>	Glossary Item
<i>METeOR identifier:</i>	327408
<i>Registration status:</i>	Housing assistance, Standard 01/03/2005
<i>Definition:</i>	A separate building (also referred to as a rooming or lodging house) containing multiple boarding/rooming/lodging house bedrooms and/or boarding house units .
<i>Context:</i>	The identification of boarding house buildings from individual boarding house rooms or units is important in calculating the operational costs for this type of dwelling.

Collection and usage attributes

<i>Guide for use:</i>	<p>In Victoria, the term 'rooming house' is used and the term 'boarding house' is used to distinguish cases where meals are also provided.</p> <p>Section 5A of the Social Security Act 1991 states that:</p> <p>5A(5A) A person's accommodation is exempt accommodation (i.e. they are eligible for Commonwealth Rent Assistance (CRA) at the full single rate) if it is in premises that are, in the Secretary's opinion, a boarding house, guest house, hostel, private hotel, rooming house, lodging house or similar premises.</p> <p>5A(5B) In forming an opinion about a person's accommodation for the purpose of subsection (5A), the Secretary is to have regard to the characteristics of the accommodation including, in particular, whether or not the following are characteristics of the accommodation:</p> <p>(a) the premises are known as a boarding house, guest house, hostel, hotel, private hotel, rooming house, lodging house or similar premises;</p> <p>(b) a manager or administrator (other than a real estate agent) is retained to manage the premises or administer the accommodation on a daily or other frequent regular basis;</p> <p>(c) staff are retained by the proprietor or manager of the premises to work in the premises on a daily or other frequent regular basis;</p> <p>(d) the residents lack control over the day-to-day management of the premises;</p> <p>(e) there are house rules, imposed by the proprietor or manager, that result in residents having rights that are more limited than those normally enjoyed by a lessee of private residential accommodation (for example, rules limiting the hours of residents' access to their accommodation or limiting residents' access to cooking facilities in the premises);</p> <p>(f) the person does not have obligations to pay for his or her costs of gas, water or electricity separately from the cost of the accommodation;</p> <p>(g) the accommodation is not private residential accommodation, having regard to:</p> <ul style="list-style-type: none">• the number and nature of bedrooms in the premises; or• the number of people who are not related to one another
-----------------------	--

- living at the premises; or
 - the number and nature of bathrooms in the premises;
- (h) the person's accommodation has not been offered to the person on a leasehold basis;
- (i) there is no requirement that the person pay a bond as security for either the payment of rent or the cost of any damage caused by the person, or for both;
- (j) the person's accommodation is available on a daily or other short-term basis.
- 5A(5C) Each of the characteristics set out in subsection 5(B) points towards the accommodation in question being exempt accommodation (i.e. the person is eligible for CRA at the full single rate)

Disability

Identifying and definitional attributes

<i>Metadata item type:</i>	Glossary Item
<i>METeOR identifier:</i>	327304
<i>Registration status:</i>	Community Services, Standard 01/03/2005 Housing assistance, Standard 01/03/2005 Health, Standard 29/11/2006
<i>Definition:</i>	<p>Disability is the umbrella term for any or all of: an impairment of body structure or function, a limitation in activities, or a restriction in participation.</p> <p>Disability is a multi-dimensional and complex concept and is conceived as a dynamic interaction between health conditions and environmental and personal factors (WHO 2001:6).</p>

Collection and usage attributes

<i>Comments:</i>	<p>Many different 'definitions' of disability are used in Australia, both in administrative data collections and in Acts of Parliament. The consistent identification of disability in national data collections has been recommended in a number of reports, for instance to enable:</p> <ul style="list-style-type: none">• the monitoring of access to generic services by people with disability;• the collection of more consistent data on disability support and related services, including data on service use by different groups;• population data and service data to be related, thereby improving the nation's analytical capacity in relation to the need for and supply of services; and• improved understanding of the relationship between disability, health conditions and other health outcomes. <p>Defining disability makes it possible to determine the number of people who are accessing services, both disability specific and generic, and also those with a disability in the general population with unmet need. Better definition of disability will aid better targeting of resources to those in need.</p> <p>Disability arises from the interaction between health conditions and environmental and personal factors. A health condition may be a disease (acute or chronic), disorder, injury or trauma. Environmental factors make up the physical, social and attitudinal environment in which people live and conduct their lives. Personal factors relate to the individual, such as age, sex and Indigenous status.</p> <p>The concept 'Disability' can be described using a combination of related metadata items as building blocks.</p> <p>The metadata items selected may vary depending on the definition of disability used. For example, in hospital rehabilitation, the focus may be on the impairment and activity dimensions and in community-based care the focus may be primarily on participation. Some applications may require a broad scope for inclusion (e.g. discrimination legislation). Data collections relating to services will select combinations of the data elements, which best reflect the eligibility criteria for the</p>
------------------	---

service.

This glossary item is based on the International Classification of Functioning, Disability and Health (ICF). The ICF was endorsed by the World Health Assembly in 2001 as a reference member of the WHO Family of International Classifications and of the Australian Family of Health and Related Classifications (endorsed by the National Health Information Management Group in 2002).

The ICF provides a framework for the description of human functioning and disability. The components of ICF are defined in relation to a health condition. A health condition is an 'umbrella term for disease (acute or chronic), disorder, injury or trauma' (WHO 2001). A health condition may be recorded, for example, as Episode of care principal diagnosis, code (ICD-10-AM 3rd Edn) ANN{.N[N]} and Episode of care additional diagnosis, code (ICD-10-AM 3rd Edn) ANN{.N[N]}.

Geographic indicator

Identifying and definitional attributes

<i>Metadata item type:</i>	Glossary Item
<i>METeOR identifier:</i>	327306
<i>Registration status:</i>	Community Services, Standard 01/03/2005 Housing assistance, Standard 22/10/2005 Health, Standard 01/03/2005 Homelessness, Standard 22/10/2005
<i>Definition:</i>	<p>A classification scheme that divides an area into mutually exclusive sub-areas based on geographic location.</p> <p>Some geographic indicators are:</p> <ul style="list-style-type: none">• Australian Standard Geographical Classification (ASGC, ABS Cat No. 1216.0),• administrative regions,• electorates,• Accessibility/Remoteness Index of Australia (ARIA),• Rural, Remote and Metropolitan Area Classification (RRMA), and• country.
<i>Context:</i>	<p>To enable the analysis of data on a geographical basis.</p> <p>Facilitates analysis of service provision in relation to demographic and other characteristics of the population of a geographic area.</p>

Collection and usage attributes

<i>Comments:</i>	<p>Person (address) – Australian postcode (Postcode datafile), code [NNNN] is not included in the above listing, as it is, strictly speaking, not a geographic indicator. Sometimes postcodes are used in the analysis of data on a geographical basis, which involves a conversion to Statistical Local Area (an Australian Bureau of Statistics geographical structure). This conversion results in some inaccuracy of information. However, in some data sets Person (address) – Australian postcode (Postcode datafile), code [NNNN]; is the only geographic identifier, therefore the use of other more accurate indicators (for example, conversion from address line to Statistical Local Area) is not always possible.</p>

Greatest need

Identifying and definitional attributes

Metadata item type: Glossary Item

METeOR identifier: 494368

Registration status: No registration status

Definition: Greatest need households are low income households that at the time of allocation were subject to one or more of the following circumstances:

- they were homeless
- their life or safety was at risk in their accommodation
- their health condition was aggravated by their housing
- their housing was inappropriate to their needs; or
- they had very high rental housing costs.

Head-leased dwelling (government)

Identifying and definitional attributes

<i>Metadata item type:</i>	Glossary Item
<i>METeOR identifier:</i>	327318
<i>Registration status:</i>	Housing assistance, Standard 01/03/2005
<i>Definition:</i>	Dwellings owned by state and territory governments that are leased to other government or non-government organisations via head-leasing arrangements.
<i>Context:</i>	Head-leasing involves at least two leases: one between the dwelling owner and the lessee, and one between the provider and the tenant. The Residential Tenancies Act applies to both leases.

Head-leased dwelling (private)

Identifying and definitional attributes

<i>Metadata item type:</i>	Glossary Item
<i>METeOR identifier:</i>	327414
<i>Registration status:</i>	Housing assistance, Standard 01/03/2005
<i>Definition:</i>	Dwellings owned by private individuals or private corporations that are leased to Commonwealth-State Housing Agreement (CSHA) housing providers via head-leasing arrangements. The CSHA housing provider is usually responsible for tenant selection and tenancy management functions.
<i>Context:</i>	Head-leasing involves at least two leases: one between the dwelling owner and the lessee, and one between the provider and the tenant. The Residential Tenancies Act applies to both leases.

Collection and usage attributes

<i>Comments:</i>	Head-leasing is commonly undertaken in the community housing sector, where non-Government organisations head-lease housing stock from the private sector and state and territory Governments, and sub lease it directly to the tenants. It is important to identify those dwellings that are head-leased from the private sector, as maintenance and other management costs are generally incurred by the owner, and therefore may not be captured in the annual CSHA data collections.

Homeless (SAAP)

Identifying and definitional attributes

<i>Metadata item type:</i>	Glossary Item
<i>METeOR identifier:</i>	327316
<i>Registration status:</i>	Housing assistance, Standard 01/03/2005
<i>Definition:</i>	<p>A person is homeless if he or she does not have access to safe, secure and adequate housing. Unsafe, insecure and inadequate housing includes housing:</p> <ul style="list-style-type: none">• in which the client did not feel safe (this can include the client's own home);• in which the client did not have a legal right to continued occupation of their home (security of tenure);• that lacked the amenities or resources necessary for living (such as adequate heating, plumbing or cooking facilities); and• provided by a Supported Accommodation Assistance Program (SAAP) agency of other emergency accommodation agency.

Collection and usage attributes

<i>Guide for use:</i>	This is the broadest definition of homeless and is not used for Commonwealth-State Housing Agreement (CSHA) reporting purposes. The definition of homeless that is used in CSHA data collections can be found in the 'Household - Greatest need status' metadata item.
<i>Comments:</i>	<p>There is considerable concern over the number of homeless people in society and the assistance they require.</p> <p>Collecting information on homeless people is problematic, as the concept of 'homelessness' encompasses elements in addition to whether, someone resides in a dwelling or not.</p> <p>A SAAP client should either be homeless or at imminent risk of becoming homeless, as defined by the SAAP Act. A person who requires the support of a SAAP worker to maintain their current housing situation is at imminent risk.</p>

Household

Identifying and definitional attributes

Metadata item type: Glossary Item

METeOR identifier: 465183

Registration status: Housing assistance, Recorded 13/10/2011

Definition: A group of two or more related or unrelated people who usually reside in the same dwelling, and who make common provision for food or other essentials for living, or a single person living in a dwelling who makes provision for his or her own food and other essentials for living, without combining with any other person.

Context: Housing assistance; health sector

Tenancy composition

Identifying and definitional attributes

<i>Metadata item type:</i>	Glossary Item
<i>METeOR identifier:</i>	327444
<i>Registration status:</i>	Housing assistance, Standard 01/03/2005
<i>Definition:</i>	<p>The grouping of dwelling or tenancy occupants based on the presence or absence of one or more reported couple or parent-child relationships. Households can be single family, group or mixed composition households.</p> <p>A single family household is a household consisting of a main tenant with or without a spouse and with or without children. A group household is a household consisting of two or more tenants who are aged 16 years and over and not in a reported couple or parent-child relationship. A mixed composition household is one which is neither a single family nor group household (they may contain multiple single family households).</p>
