# Person—mode of statistical survey completion, code N[N]

## Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Mode of statistical survey completion
METEOR identifier:	521297
Registration status:	<a href="#">Health</a> , Standard 25/01/2018
Definition:	The mode by which responses to a statistical survey are provided by a person, as represented by a code.

## Data element concept attributes

### Identifying and definitional attributes

Data element concept:	<a href="#">Person—mode of statistical survey completion</a>
METEOR identifier:	521295
Registration status:	<a href="#">Health</a> , Standard 25/01/2018
Definition:	The mode by which responses to a statistical survey are provided by a person.
Object class:	<a href="#">Person</a>
Property:	<a href="#">Mode of statistical survey completion</a>

### Source and reference attributes

Submitting organisation:	Patient Experience Information Development Working Group (PEIDWG) Australian Commission on Safety and Quality in Health Care (ACSQHC) National Health Information Standards and Statistics Committee (NHISSC)
--------------------------	---

## Value domain attributes

### Identifying and definitional attributes

Value domain:	<a href="#">Mode of statistical survey completion code N[N]</a>
METEOR identifier:	521290
Registration status:	<a href="#">Health</a> , Standard 25/01/2018
Definition:	A code set representing the mode by which a statistical survey collection instrument is completed.

### Representational attributes

<b>Representation class:</b>	Code	
<b>Data type:</b>	Number	
<b>Format:</b>	N[N]	
<b>Maximum character length:</b>	2	
	<b>Value</b>	<b>Meaning</b>
<b>Permissible values:</b>	1	Paper and pencil interviewing (PAPI)
	2	Computer assisted personal interviewing (CAPI)

3	Paper forms
4	Computerised self-administered questionnaire (CSAQ)
5	Computer assisted telephone interviewing (CATI)
6	Telephone paper and pencil interviewing (PAPI)
7	Interactive voice response (IVR)
88	Other

## Collection and usage attributes

### Guide for use:

#### CODE 1 Paper and pencil interviewing (PAPI)

This code describes instances where the interviewer asks the respondent the survey questions and records the responses on a paper form. The interviewer generally travels to the respondent's home or business and asks the respondent the interview questions in person, in accordance with the prepared questionnaire.

#### CODE 2 Computer assisted personal interviewing (CAPI)

This code describes instances where the interviewer takes a portable computer to the interview and enters the data into the computer as the respondent provides it. The interviewer generally travels to the respondent's home or business and asks the respondent the interview questions in person, in accordance with the prepared questionnaire.

#### CODE 3 Paper forms

This code describes instances where forms are mailed, faxed or dropped off to respondents who fill out the forms themselves and return the forms by any of a number of methods.

#### CODE 4 Computerised self-administered questionnaire (CSAQ)

This code describes instances where respondents complete forms themselves electronically, using a computer. Includes web forms, offline electronic forms and Computer assisted self-administered interview (CASI), where an interviewer visits the respondent with a portable computer containing an electronic version of the questionnaire. The respondent uses the computer to complete the form themselves, rather than being asked the questions by the interviewer.

#### CODE 5 Computer assisted telephone interviewing (CATI)

This code describes instances where the interviewer reads the survey questions and records the respondent's answers using a computer interface.

#### CODE 6 Telephone paper and pencil interviewing (PAPI)

This code describes instances where the interviewer reads the survey questions and records the respondent's answers using a paper script or questionnaire.

#### CODE 7 Interactive voice response (IVR)

This code describes instances where a pre-recorded voice lists a series of options, prompts and questions. The user provides their responses either through a telephone keypad or verbally.

#### CODE 88 Other

This code denotes instances of survey completion modes other than those modes listed above.
