Value domain attributes

Representational attributes

Representation class: Text

Data type: String

Format: X[X(59)]

Maximum character length: 60

Data element attributes

Collection and usage attributes

Guide for use: The town or locality name should be collected as stated on a birth certificate, parish

record or official document.

An English-language form is acceptable, for example Vienna for Wien.

International country codes identified by the Australian Bureau of Statistics and in METeOR (see <u>Person—country of birth, code (SACC 2011) NNNN</u>) may also be used, but should include synonyms for commonly misunderstood names of countries such as The Netherlands = Holland and Deutschland = Germany.
