Address—electronic communication address, text X[X(1099)]

Identifying and definitional attributes

Metadata item type:	Data Element
Short name:	Electronic communication address
Synonymous names:	Electronic communication details
METEOR identifier:	522692
Registration status:	Disability , Standard 14/02/2018 Health , Standard 05/10/2016 Indigenous , Standard 22/10/2018
Definition:	A unique combination of characters used as input to electronic communication equipment for the purpose of contacting an entity, as represented by text.
Data Element Concept:	Address—electronic communication address
Value Domain:	Text X[X(1099)]

Value domain attributes

Representational attributes

Representation class:	Text
Data type:	String
Format:	X[X(1099)]
Maximum character length:	1100

Data element attributes

Collection and usage attributes

Guide for use:	Electronic communication details may be collected for an email address; telephone number; Skype name; or for any other unique identification of an electronic communication mechanism.
Collection methods:	Collection systems may include validation of the content of the electronic communication details field; that is, confirming that the email address is valid or that the telephone number is correctly structured.

Source and reference attributes

Submitting organisation:	Australian Institute of Health and Welfare
Reference documents:	Standards Australia 2014. AS 4846:2014 Person and provider identification in healthcare. Sydney: Standards Australia.
