Occupation code (Standards Australia-modified ANZSCO 1st edition) NNNN[**{NN}**[-**NN**]]

Identifying and definitional attributes

Metadata item type:	Value Domain
METEOR identifier:	524318
Registration status:	Health , Recorded 13/03/2014
Definition:	The Standards Australia-modified ANZSCO (1st edn) code set representing an occupation of a person.

Representational attributes

Classification scheme:	Australian and New Zealand Standard Classification of Occupations, First edition, 2006
Representation class:	Code
Data type:	Number
Format:	NNNN[{NN} [- NN]]
Maximum character length:	6

Collection and usage attributes

Guide for use:	<p>The Standards Australia-modified version of ANZSCO uses a selection of unit groups (or registration boards) that relate to professions that have the potential to work in a health-related field. This level of the ANZSCO code must be recorded at a minimum. An occupation code (or speciality) {NN} can be added if additional specification is required. In addition, Standards Australia-modified ANZSCO gives the option of one to two extra digits that are not recorded in the ANZSCO (unmodified). These digits relate to the chronological order in which a specialisation (sometimes called 'field of speciality') is mentioned under the ANZSCO (unmodified, i.e. as published by the ABS) occupation description.</p>
-----------------------	--

ANZSCO 1st edition revision 1

The revision to ANZSCO has added an extra level of complexity to some Standards Australia-modified ANZSCO specialisation codes. Some have previously unmentioned specialisation under certain occupations. New specialisations in revision 1 are recorded in chronological order starting with the next number after the last recorded code in the unrevised ANZSCO 1st edition.
