Definition: A human being.

Collection and usage attributes

Comments: Prior to 13 March 2018, the definition of the 'Person' Object class was 'A human being, whether man, woman or child'. From 13 March 2018, the definition was edited by removing the words '...whether man, woman or child' so that a person is defined as 'A human being'. This amendment was undertaken to align the definition of a person with the *Australian Government Guidelines on the Recognition of Sex and Gender* and the Australian Bureau of Statistics (ABS) *Standard for Sex and Gender Variables*, which recognise that there are sex and gender types that are not exclusively male or female.

Property attributes

Identifying and definitional attributes

Property: [Cancer screening test type](#)

METEOR identifier: 529824

Registration status:

- [Health](#), Standard 29/08/2014

Definition: The type of screening test used to determine whether further testing is required to diagnose cancer.

The type of screening test selected will depend on the type of cancer. For example, the primary screening test for:

- Breast cancer is mammograms
- Bowel cancer is the [faecal occult blood test](#) (FOBT)
- Cervical cancer is Papanicolaou smear or 'Pap test'.

Property group: [Screening event](#)
