Disease screening test results sent date

Identifying and definitional attributes

Metadata item type:	Property
METEOR identifier:	529999
Registration status:	• Health, Standard 29/08/2014
Definition:	The date on which results from a disease screening test are sent to an individual. Disease screening is the repeated testing, at regular intervals, of apparently well people to detect a medical condition at an earlier stage than would otherwise be the case.
Property group:	Screening event
